In the late 1950s, Limelight was the busiest coffeehouse in New York and the only photography gallery in the country. This is the story of Helen Gee's efforts to open Limelight and her fight to keep it afloat for seven years. The major figures in photography appear in this story -- Edward Steichen, Robert Frank, W. Eugene Smith, Berenice Abbott, and others -- and so do the big events of the period: the opening of *The Family of Man*, the publication of *The Americans*. Gee has her own personal stories as well, raising her Asian American daughter alone, dealing with a landlord with underworld ties, bookies who did business in the hall of her apartment house, and coping with unwelcome advances, quixotic employees, and suicidal photographers. This is also a portrait of a time when Greenwich Village was a center of creative activity, when actors, writers, painters, and photographers were part of a burgeoning coffeehouse scene. Photography as an art form was coming into its own, and Limelight Gallery made history with some seventy shows. The story of its seven years is amusing and heart-breaking, exciting and surprisingly full of adventure. "The structure of this book reflects three major lines of interest : the establishment of a precise chronology and a fundamental history of early photography in the Holy Land; the analysis of cultural, social, economic, and political biases that have informed photographic production; and the detection of characteristic trends in photography within the preindustrial context of an underdeveloped country. The particular conditions under which photography was introduced into such contexts demand a shift in focus, one offered here, I believe for the first time, a shift that entails taking into account the special sociocultural and economic factors prevalent in these environments."--Préface et remerciements. Renowned photographer Lauren Greenfield has won acclaim and awards for her studies of youth culture. In *Girl Culture*, she combines a photojournalist's sense of story with fine-art composition and color to create an astonishing and intelligent exploration of American girls. Her photographs provide a window into the secret worlds of girls' social lives and private rituals, the dressing room and locker room, as well as the iconic subcultures of the popular clique: cheerleaders, showgirls, strippers, debutantes, actresses, and models. With 100 hypnotic photographs, 20 interviews with the subjects, and an introduction by foremost historian of American girlhood Joan Jacobs Brumberg, Greenfield reveals the exhibitionist nature of modern femininity and how far it has drifted from the feminine ideologies of the past. Inevitable death and our agony to attain

Utopia have made existence a form of pathology. We are left with the secret need for redemption which few of us will understand or witness. This need still lives in acts of love, courage and art. In the images included in this book it is found in the conjoined destinies of artist and subject, phantoms on either side of that curtain we call photography. Implicit in these photographs is the brutal extreme of their purpose and an intimation however distant to their makers that something was manifested beyond the event itself. Anne Marsh's treatise on the art of photography traces its theoretical underpinning from the early debates between the rationalists and the fantasists, through psychoanalytical interpretations, to the theatre of desire. She investigates the role of photography in 'ghostly performances', 'the masking of desire' and 'high camp aesthetics' - through to 'performance art' and the role of the photographer as a 'gender terrorist' - as in the work of Del LaGrace Volcano. The study concludes with notable examples of postmodern photography as they have occurred in the Australian context. This ground-breaking work by a leading Monash University academic will interest all students of photography and followers of recent trends in art and art theory. Vicki Goldberg, one of the leading voices in the field of photography criticism, is well known for her cogent and perceptive writing, which is regularly featured in such national publications as "The New York Times," "American Photographer" and "Vanity Fair." "Light Matters" gathers for the first time a selection of this remarkable author's essays and criticism, culled from her writings published over the past 25 years. Goldberg's take on photography is both insightful and encompassing: her subjects range from pop imagery to war journalism, from photo-booth portraits to manipulated digital imagery, from the "boredom" of voyeurism to the great preponderance of tragic photographs in the news. She brings new light to the work of the medium's "old masters," among them Walker Evans, Lotte Jacobi and Lartigue, writing with equal acuity about contemporary trailblazers such as Bill Viola, Daido Moriyama and Bastienne

Schmidt. Goldberg also tackles provocative larger issues facing the medium, such as the potentially "transgressive" nature of photographs, and the camera's powerful role in a culture of commodification. Dismissing clichés and deftly negotiating the many diverging paths photography now follows, Goldberg demonstrates how to consider not just photographic images themselves, but their impact, and the meaning of that impact. "Vicki Goldberg: Light Matters" showcases a writer of great intelligence, wit and insight, whose understanding of this multifarious and evolving medium is unsurpassed. ... This practical book, complete with pictures by and interviews with some of the world's top photographers, shows you how to tap your brain's potential. For example Ralph Gibson, Marilyn Bridges, Simon Fulford, Larry Clark, Kathleen Kenyon, Mary Frey, Lucien Clergue, Tom Drahos, Andreas Mahl and Bernard Faucon explain how to develop rational, directed approaches with your brain's left hemisphere ... Our perceptions of children are only too often distorted by our inclination to project grown-up fantasies of innocence and naivete onto them. Working with children, American photographer Wendy Ewald reveals the lucidity and precision of their powers of observation, gently but assuredly overturning cherished notions of childhood as a paradise lost. In *Secret Games* Ewald leads you into a world that is as eerie, haunting and threatening as it is joyous and mischievous -- life as children really experience it. In 1969, when Wendy Ewald taught photography to children for the first time on a Native American reservation in Nova Scotia, she was stunned by how astute and beautiful their photographs of the environment they were growing up in were. Moving on to the Kentucky Appalachians, she continued working with children,

combining her own photographs with the children's photographs and writings. For the past thirty years she has worked with children and women all over the world. Secret Games offers a comprehensive overview of Ewald's collaborative works, with in-depth texts by Ewald tracing the evolution of her work and the ideas guiding it. Although critics defended the trend, arguing that truly visionary art transcended politics, Bezner notes that the cold war era effectively silenced some of the most socially engaged photographers in American society."--BOOK JACKET.
