Part of an integrated, two-book set that covers theory and hands-on content in separate Classroom and Shop Manuals, this Classroom Manual allows students to learn fundamental climate control theory before applying their knowledge through practical, hands-on automotive work using the Shop Manual. Written for the do-it-yourselfer, good enough for the pro. Includes everything you wish to know about your vehicles heating and air conditioning. From simple adjustments, to complete tune-ups and troubleshooting. The Air Conditioning Manual assists entry-level engineers in the design of air-conditioning systems. It is also usable - in conjunction with fundamental HVAC&R resource material - as a senior- or graduate-level text for a university course in HVAC system design. The manual was written to fill the void between theory and practice - to bridge the gap between real-world design practices and the theoretical calculations and analytical procedures or on the design of components. This second edition represents an update and revision of the manual. It now features the use of SI units throughout, updated references and the editing of many illustrations. * Helps engineers quickly come up with a design solution to a required air conditioning system. * Includes issues from comfort to cooling load calculations. * New sections on "Green HVAC" systems deal with hot topic of sustainable buildings. "In the middle of a repair, water starts to gush unexpectedly. What's one to do? ARCO puts a wealth of job related information in a pocket sized guide. From terms of the trade to troubleshooting advice, it's the perfect companion for anyone in the field." -- B&N from the publisher (July 2007). The author has had wide experience in cost and labour estimating, having worked for some of the largest construction firms in the world. He has made and assembled numerous types of estimates including lump-sum, hard-priced, and scope, and has conducted many time and method studies in the field and in fabricating shops. John S. Page has received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering.
