Petroleum Production Systems Mar 08 2021 Written by four leading experts, this edition thoroughly introduces today's modern principles of petroleum production systems development and operation, considering the combined behaviour of reservoirs, surface equipment, pipeline systems, and storage facilities. The authors address key issues including artificial lift, well diagnosis, matrix stimulation, hydraulic fracturing and sand control. They show how to optimise systems for diverse production schedules using queuing theory, as well as linear and dynamic programming. Throughout, they provide both best practices and rationales, fully illuminating the exploitation of unconventional oil and gas reservoirs. Updates include: Extensive new coverage of hydraulic fracturing, including high permeability fracturing New sand and water management techniques * An all-new chapter on Production Analysis New coverage of digital reservoirs and self-learning techniques New skin correlations and HW flow techniques

Photographer's Guide to the Panasonic Lumix LX3 Feb 16 2022 Photographer's Guide to the Panasonic Lumix LX3: Getting the Most from Panasonic's Versatile Digital Camera is a follow-up to the author's well-received guide to a very similar camera, the Leica D-Lux 4. This new guidebook covers all features and operations of the LX3, one of the most highly esteemed compact digital cameras of recent years. In 232 pages, with numerous color photographs and illustrations, the book explains in plain language how to achieve the best possible results taking pictures with the automatic or manual controls of the LX3. Although much of the information in this book is similar to that in the earlier book about the Leica D-Lux 4 camera, this new volume is updated to include several new features that were added to both cameras when their internal firmware (operating system) was upgraded to version 2.0. These new features include white balance bracketing, 1:1 aspect ratio, lens resume, and several others. Therefore, the book will be useful to users of the latest versions of both the Panasonic Lumix LX3 and the Leica D-Lux 4.

The Moment It Clicks Aug 01 2020 THE FIRST BOOK WITH ONE FOOT ON THE COFFEE TABLE, AND ONE FOOT IN THE CLASSROOM Joe McNally, one of the world's top pro digital photographers, whose celebrated work has graced the pages of Sports Illustrated, Time, and National Geographic (to name a few), breaks new ground by doing something no photography book has ever done—blending the rich, stunning images and elegant layout of a coffee-table book with the invaluable training, no-nonsense insights, and photography secrets usually found only in those rare, best-of-breed educational books. When Joe's not on assignment for the biggest-name magazines and Fortune 500 clients, he's in the classroom teaching location lighting, environmental portraiture, and how to “get the shot” at workshops around the world. These on-location workshops are usually reserved for a handful of photographers each year, but now you can learn the same techniques that Joe shares in his seminars and lectures in a book that brings Joe's sessions to life. What makes the book so unique is the “triangle of learning” where (1) Joe distills the concept down to one brief sentence. It usually starts with something like, “An editor at National Geographic once told me...” and then he shares one of those hard-earned tricks of the trade that you only get from spending a lifetime behind the lens. Then, (2) on the facing page is one of Joe's brilliant images that perfectly illustrates the technique (you'll recognize many of his photos from magazine covers). And (3) you get the inside story of how that shot was taken, including which equipment he used (lens, f/stop, lighting, accessories, etc.), along with the challenges that type of project brings, and how to set up a shot like that of your own. This book also gives you something more. It inspires. It challenges. It informs. But perhaps most importantly, it will help you understand photography and the art of making great photos at a level you never thought possible. This book is packed with those “Ah ha!” moments—those clever insights that make it all come together for you. It brings you that wonderful moment when it suddenly all makes sense—that “moment it clicks.”

Photographing Indoor Sports Aug 13 2021 This is a book about photographing low-light and indoor sports—not as a professional working for a major sports publication or website—but as a parent or friend trying to capture a great memory. In Photographing Indoor Sports, author and photographer Alan Hess takes you through the basics of shooting basketball in the gym, martial arts at a dojo, water polo inside, and night football games under the lights. Photographing these sports can be a challenge, because you need to use action-stopping shutter speeds without a lot of light. This means using lenses that open as wide as possible and ISO settings that can introduce a lot of digital noise. This book covers all of these techniques to help you get that ideal sports shot in low light—and hopefully have some fun along the way. Follow along with Alan and you will: Learn how to handle low-light scenarios by adjusting your White Balance setting, noting where the lights are the brightest, and watching as the action crosses into different areas Understand the importance of using a wide-open lens with a high ISO setting to get the right exposure for your low-light action shots Explore post-processing techniques such as noise reduction and black-and-white conversion with Silver Efex Pro and the Saturation Slider in Adobe Camera Raw or Photoshop Lightroom
