Investigating the Role of Test Methods in Testing Reading Comprehension Oct 11 2021 This book explores the construct of reading comprehension by means of two main test methods. Research methods like the think aloud protocol and eye tracking are employed to tap into test-takers' cognitive processes while engaged in input text meaning building, and in test tasks. The book is the first systematic attempt to explore test-takers' cognitive processes through the control of test methods, and presents findings in visualized form including processing route maps and eye fixation heat maps. It offers readers essential support with "digging into" and analyzing data that has to date remained difficult to access.

Classroom Reading Inventory Mar 24 2020 This trusted reading inventory resource is ideal for pre-service and in-service teachers who use an informal reading inventory test to help identify students' reading problems. A classic in the field, it is the leading reading inventory text, brief and easy to use in a consumable, spiral-bound format. The CRI (Classroom Reading Inventory) is specially prepared for in- and pre-service teachers who have little or no experience with informal reading inventories. It is designed to be administered in fifteen minutes or less. Form A follows a subskills format and Form B follows a reader response format designed around the predicting and retelling of stories. Teachers can test reading comprehension and word-recognition abilities, and also inferential and critical reading and thinking abilities. Both forms include a pretest and a posttest. Eighty percent of the stories used for the CRI test in the ninth edition are new. They are more contemporary and inclusive, and reflect multicultural themes. Most stories are now 30% longer. Finger tabs have been added so the user can flip more easily to major sections. Also available to the instructor is an audio tape for practice scoring and interpretation.

Hodder Group Reading Tests Dec 01 2020

The Hodder Group Reading Tests 1-3 assess pupils' reading comprehension at word, sentence and text levels. They are designed as wide-range tests, and thus are especially useful in screening and monitoring mixed-ability groups where some pupils may be much more advanced, or much slower, than the average. The Hodder Group Reading Tests 1-3 all have parallel forms A and B, for use with the following age groups: Test 1 - ages 5:0 to 9:0

(Years 1 to 3); Test 2 - ages 7:0 to 12:0 (Years 2 to 6); Test 3 - ages 9:5 to 16+ (Years 5 to 11)

Each test takes about 30 minutes to administer to whole class or year groups: the parallel forms A and B can be used simultaneously to minimise copying, as well as to assess progress over time. At each level, the tests include questions which assess pupil's understanding of word meanings, culturally neutral sentence-completion questions, and higher-level 'cloze' tasks that require pupils to both comprehend and reflect upon the content and the context of continuous text. Dependable norms express performance as standardised scores, reading ages and national curriculum levels. This revised edition establishes time limits and extended norms which make the Hodder Group Reading Tests 2 and 3 ideal for 'access arrangement' assessments at Key Stages 2, 3 and GCSE. A Scorer/Profiler CD-ROM is available separately to automate score conversions and help analyse and interpret group performance data.
