Scottish-American Gravestones, 1700-1900, by David Dobson, contains more than 1,500 death records arranged alphabetically according to the surname of the decedent. While the transcriptions vary, all of them also give the decedent's date and place of death and the source of the information, as well as, in many instances, the names of the individual's parents, name of spouse, and even a word or two about occupation. While this diminutive volume can scarcely purport to be the final word on its subject, it nonetheless affords a substantial number of links to researchers hoping to bridge the gap between Scotland and North America. The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility (CSR) for 58 countries and 5 global regions. Each regional and national profile includes key information about the relevant CSR history, country-specific issues, trends, research and leading organizations. The purpose of the book is to give CSR professionals (including managers, consultants, academics and NGOs focusing on the social, environmental and ethical responsibilities of business) a quick reference guide to CSR in different regional and national contexts. The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally, but find that country-specific CSR information is ad hoc, limited or non-existent. Even where national CSR research exists, it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read. The book is an edited volume, with expert contributors from around the world, all of whom have been screened and selected on the basis of their qualifications and experience in CSR. Each regional/country profile includes the following subsections:CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate. A modern guide to food, drink, work, rest and play from the cult London coffee brand. Based on a decade of eating and drinking in London, **A Modern Guide to City Living** offers the Grind guide to almost everything. Whether you're looking for how to make a flat white at home, how to politely bail on a date, or just find flatmates that don't suck, Grind present their sometimes questionable (always entertaining) advice on living in the city today. Throughout, you'll find recipes and stories from ten years of Grind in London chronicling everything from the rich world history of coffee, to how to make killer avocado toast for brunch and even the secret to their infamous Espresso Martini – regularly name-checked as the very best in London. @grind / grind.co.uk Over the last twenty or so years, it has become standard to require policy makers to base their recommendations on evidence. That is now uncontroversial to the point of triviality--of course, policy should be based on the facts. But are the methods that policy makers rely on to gather and analyze evidence the right ones? In **Evidence-Based Policy**, Nancy Cartwright, an eminent scholar, and Jeremy Hardie, who has had a long and successful career in both business and the economy, explain that the dominant methods which are in use now--broadly speaking, methods that imitate standard practices in medicine like randomized control trials--do not work. They fail, Cartwright and Hardie contend, because they do not enhance our ability to predict if policies will be effective. The prevailing methods fall short not just because social science, which operates within the domain of real-world politics and deals with people, differs so much from the natural science milieu of the lab. Rather, there are principled reasons why the advice for crafting and implementing policy now on offer will lead to bad results. Current guides in use tend to rank scientific methods according to the degree of trustworthiness of the evidence they produce. That is valuable in certain respects, but such approaches offer little advice about how to think about putting such evidence to use. **Evidence-Based Policy** focuses on showing policymakers how to effectively use evidence, explaining what types of information are most necessary for making reliable policy, and offers lessons on how to organize that information. Reconstructed from hundreds of hours of interviews and thousands of pages of documentation, this reference focuses on one of Australia's oldest and proudest corporations, Hardie, retelling the story of one of the worst industrial poisons of the 20th century, asbestos. This compelling narrative relates the frantic financial engineering in 2001, during which Hardie cut adrift its liabilities to sufferers of asbestos-related disease, the public and political odium that followed, and the extraordinary deal that resulted. Includes section: **Law reports. Dowling's Engineering Your Future: An Australasian Guide, Fourth Edition** is used for first year, core subjects across all Engineering disciplines. Building on the previous editions, this text has been updated with new references, while still maintaining a strong and practical emphasis on skills that are essential for problem solving and design. Numerous topical and locally focused examples of projects across engineering disciplines help demonstrate the role and responsibilities of a professional engineer. Themes of sustainability, ethical practice and effective communication are a constant throughout the text. This full-coloured print with interactive e-text resource has a variety of digital media embedded at the point of learning such as videos and knowledge-check questions to engage students and to help consolidate their learning.
