In recent years, firms in emerging market countries have increased borrowing, particularly in foreign currency, owing to easy access to global capital markets, prolonged low interest rates and good investment opportunities. This paper discusses the trends in emerging market corporate debt and leverage, and illustrates how those firms are vulnerable to interest rate, exchange rate and earnings shocks. The results of a stress test show that while corporate sector risk remains moderate in most emerging economies, a combination of macroeconomic and financial shocks could significantly erode firms' ability to service debt and lead to higher debt at risk, especially in countries with high shares of foreign currency debt and low natural hedges. I'm going to get you prepared and fast-track your AWS Certified Cloud Practitioner exam success. The great thing about the cloud practitioner exam is it's very suitable for people coming from many different backgrounds. So, it doesn't matter if you have little or no technical experience, or if you do have a technical background and you're looking to transition your skill sets into the cloud. Whatever background you're coming from, this is the right book for you. Everything you need is here to make sure that you do pass your exam. You're not in this alone because I'm going to help you through it. My support link is at the bottom of this book for you to contact me any time if

you need further help. Whatever your preferred learning style, I've also got you covered. If you're a visual learner, you'll love my clear diagrams and illustrations throughout this book. You'll enjoy the facts I present to you and the cheat sheets I created because they have exam specific information in them. If you're a practical learner, you'll love my hands-on lessons so that you can get practical with AWS and learn in a hands-on way. About the hands-on lessons, there're two different types of practical lesson in this guide. The first one is a demo. A demo is a pure demonstration in which I show you something but you don't need to follow along. The reason I do that is that there are a few examples of where I want to show you something visually so that I can demonstrate to you some feature of AWS. But the set up might be a bit more complex than the cloud practitioner exam requires. Although there're just a few of those, they're a useful way to show you some things. Now, the other one is a hands-on lesson. A hands-on lesson is a follow-along, so you can actually go through AWS in your own free tier account and actually build on AWS. It will give you practical experience, which is really the best way to learn and become competent. At the end of many sections of this book, you'll find a lesson with links to my cheat sheets and you'll also find a quiz so you can test yourself as you go through the lessons. There's often an exam cram lesson as well. This is a fast-paced run through of the cool facts ideal for quick revision before you sit your exam. When you finish reading the book, I provide a full-length practice exam so you can test yourself and see if you're ready to sit the real thing. So, everything you need is here in this guide. I really hope you'll enjoy it.

Excerpt from Tests of Cellular Sheet-Steel Flooring Where the top and bottom sheets of a panel were in contact between the cells, they were joined by two rows of $\frac{3}{8}$ -inch spot welds, the welds being about 1g inches apart in each row. The horizontal portion of the assembled section where these welds occur will be spoken of subsequently as the web. In all specimens the bottom sheet was made in two parts separated down the center web. In all the specimens numbered X through XXIV the top sheet was in one piece, this representing the latest manufacturing method. The top sheets of specimens I through IX were made in two pieces with the separation occurring down the center web, this type of construction being clearly shown in the type A panel of Figure 1. In all type B specimens the top sheets were in one piece. The top sheet of the panels was bent down on either side for a lateral connection to adjacent panels when erected. The specimens were uncoated showing the mill scale on the sheets except for numbers I, VI, X, XI, and XII, which had been given one coat of paint, inside the cells as well as on the outside surface.
