Book of Science A Child's First Book about Play Therapy I Want to Go First! Stuart Little A Child's First Book of American History Smarter Charts for Math, Science, and Social Studies Little Kids First Big Book of Baby Animals (Little Kids First Big Books) A Mindset for Learning

Problems with the charts in your math kit? Want to discover the science of content-area charts? Wish you could make pre-fab social studies charts history? Then you're ready for Smarter Charts for Math, Science, and Social Studies! In the original Smarter Charts, Marjorie Martinelli and Kristi Mraz helped you turn classroom literacy charts into teaching powerhouses. Now they show how to turn up the instructional energy on content-area charts, too. "No matter what area of the curriculum, clear visuals, simple language, and constant reflection on charts are key to helping children gain independence and agency." You don't have to be a graphic designer or a subject-matter expert. In Smarter Charts for Math, Science, and Social Studies, Marjorie and Kristi share how they learned to make truly effective content-area charts with students. You'll turn

complex ideas into kid-friendly visuals, help children internalize content processes, and even increase your instructional time. "The more we charted, the less repeating we did and the more teaching was possible." With dozens of examples from the content areas, including full-color photographs, the Chartchums reveal step by step how to create charts that show Routines, Genres and Concepts, Processes, Repertoires of Strategies, and Exemplars. Then their "Charts in Action" sections show how each type of chart builds engagement and improves independence as it gradually releases responsibility to learners. Don't be content with content-area charts made by someone else for generic students. Turn to Marjorie and Kristi for charts that make learning visible for the students in front of you, no matter what the subject. Check out these videos from the authors! Kristi Mraz and Marjorie Martinelli Show Us the Tools for Smarter Charts Chart tips from the ChartChums: Part 1 Drawing People Chart tips from the ChartChums: Part 2 Icons A fact-filled introduction to a variety of jumping, crawling, and creeping insects expands from backyard favorites, including ladybugs and fireflies, to more exotic species

from the world's rain forests and deserts. "Meet dinosaurs big and small, with claws, feathers, horns, and more!"--Back cover. It may "take a village to raise a child," but most American families are struggling, with diminishing social support, to do the job on their own. While parents work longer hours for less and the costs of childcare, healthcare, and college skyrocket, the share of the U.S. budget spent on kids has fallen 22 percent since 1960. More and more children may well not make it to a healthy, productive adulthood. That's terrible for them--and for us as well. It doesn't have to be this way. In this book, renowned expert David L. Kirp clarifies the importance of investing wisely in children. He outlines a visionary "Kids First" policy agenda that's guided by a "golden rule" principle: Every child deserves what's good enough for a child you love. And he offers lively and inspiring, on-the-ground accounts of five big cradle-to-college initiatives that can change the arc of all children's lives: strong support for parents; high-quality early education; linking schools and communities to improve what both offer children; giving all youngsters access to a caring and stable adult mentor; and providing kids a nest egg to help pay for college or kick-start a career. Every kid loves mouthwatering snacks, sizzling hot lunches and delicious dinners. Your child can learn a fun lesson about the beginnings of independence and culinary creativity by reading this book. It's designed to help your child discover the joy of cooking

while making sure to practice carefulness in the kitchen. Readers learn all about pets with fur, feathers, fins, scales, and shells--and how to find and care for the perfect pet for their family. In this playful and engaging new story from innovative picture book maker Richard Byrne, Elphie is lining up with the other elephants to start the long march to the watering hole at the back of the book. As the littlest elephant, he has to go last. But Elphie really wants to go first and heenlists the help of the reader to help him move up the queue. He almost manages it until the biggest elephant shuffles everyone back to their proper positions just as they arrive at the watering hole.
