Poetry. ORANGE REMINDS YOU OF LISTENING by Kristin Abraham is one of the winners of the 2005 Elixir Press Chapbook Competition. Kristin Abraham holds an MFA from West Virginia University. Her work has appeared in such publications as Delmar, Spout, and Phoebe. ORANGE REMINDS YOU OF LISTENING is a limited edition chapbook. "You might think that dancing doesn't have a lot to do with social research, and doing social research is probably why you picked this book up in the first place. But trust me. Salsa dancing is a practice as well as a metaphor for a kind of research that will make your life easier and better." Savvy, witty, and sensible, this unique book is both a handbook for defining and completing a research project, and an astute introduction to the neglected history and changeable philosophy of modern social science. In this volume, Kristin Luker guides novice researchers in: knowing the difference between an area of interest and a research topic; defining the relevant parts of a potentially infinite research literature; mastering sampling, operationalization, and generalization; understanding which research methods best answer your questions; beating writer's block. Most important, she shows how friendships, non-academic interests, and even salsa dancing can make for a better researcher. "You know about setting the kitchen timer and writing for only an hour, or only 15 minutes if you are feeling particularly anxious. I wrote a fairly large part of this book feeling exactly like that. If I can write an entire book 15 minutes at a time, so can you." Preeminent voice teacher, actor and director Kristin Linklater goes beyond the techniques in her classic text, *Freeing the natural voice*, to a passionate exploration of the words of William Shakespeare. Using copious examples from the canon, including chapters on Shakespeare's relevance in today's world, Linklater gives us the tools to increase understanding and to make Shakespeare's words our own. MAKE THE MOST OF EVERY PHASE IN YOUR CHILD'S LIFE You have approximately 936 weeks from the time your child is born until he or she graduates from high school. It goes by fast, and kids change and grow so quickly. It's as if they change just as you're starting to figure them out. It all makes the responsibility to shape a child's faith and character feel overwhelming. Parenting Your Eighth Grader is a concise guide that simplifies what you need to know about eighth graders in general and offers interactive ways to discover more about your own eighth grader to help you make the most of this phase. Discover ...- what's changing about your child over the next 52 weeks,- the 6 things your child needs most,- and 4 conversations to have in this phase. About the Phase Guides Parenting Your Eighth Grader is part of a series of books designed especially for busy people. These guides are more than a "journal" but less than a detailed "manual." Use this book to look ahead at key ways your child will be growing this year: physically, mentally, socially, emotionally, and spiritually. Jot down thoughts and observations to help you make the most of this phase. A history of ham radio culture: how ham radio enthusiasts formed identity and community through their technical hobby, from the 1930s through the Cold War. From curtains to clothing, from around-the-world parties to arts and crafts, this work presents different perspectives on the United States in the world by shifting attention from exports to imports, from production to consumption, and from men to women. Challenges popular conceptions to outline new methods for promoting wellness and longevity, arguing that traditional medicine has not been successful in treating serious illness while urging readers to embrace a systemic understanding of

the body that incorporates the use of revolutionary technologies. This book discusses the help ecology can and can't give in environmental problem solving. In 1787, Benjamin Rush cautioned that public punishments were dangerous to the social and legal authority of the new nation. For Rush, irrepressible human sentiments all but guaranteed that public punishments would turn spectators against the institutions responsible for the punishments. Although public executions of criminals ended early in the 19th century, debate over the morality of capital punishment has continued to this day. In this unique and fascinating glimpse into public reactions to prominent executions, from colonial times to the 1990s, Kristin Boudreau focuses on the central role of populist, often ephemeral literary forms in shaping attitudes toward capital punishment. Surveying popular poems, ballads, plays, and novels, she shows that, at key times of social unrest in American history, many Americans have felt excluded by the political and legal processes, and have turned instead to inexpensive literary forms of expression in an attempt to change the course of history. Among the significant capital cases that the author discusses are: the Haymarket anarchist trial of 1886; the lynching of Leo Frank in 1914; the murder of Emmett Till in 1955 and its effects on the Civil Rights movement; Norman Mailer's treatment of the Gary Gilmore case in the 1979 novel, *The Executioner's Song*; and the 1998 execution of Karla Faye Tucker, a convicted murderer who became a born-again Christian on death row. In the concluding chapter, Boudreau examines contemporary writers, musicians, actors, and other artists who are using their artistic media to influence official policies of states that permit capital punishment. By examining these neglected texts, Boudreau brings to light a compelling story about ordinary Americans fighting an entrenched legal system at times of great national crisis. Although Christians have well-developed responses to other religions, the counterpart scholarship from Buddhists has thus far lagged behind. Breaking new ground, this book analyzes the currently favored position towards religious others, inclusivism, in Buddhist traditions. Kristin Beise Kiblinger presents examples of inclusivism from a wide range of Buddhist contexts and periods, from Pali texts to the Dalai Lama's recent works. After constructing and defending a preferred, alternative form of Buddhist inclusivism, she evaluates the thought of particular contemporary Buddhists such as Thich Nhat Hanh and Masao Abe in light of her ideal position. This book offers a more systematic treatment of Buddhist inclusivism than has yet been provided either by scholars or by Buddhist leaders.

"Child of the so-called 'Rust Belt' (moniker denoting a kind of pastoral abandonment of Capital's Capacity, instead of a concertedly choreographed re-placement of its machinery and its train of human effects--emotional / intellectual / artistic) Kristin Palm has come 'back home' with *THE STRAITS*. But this 'return' is a journey outwards and forwards. It is for all of us interested in demystifying the effective discourses of place around a global-urban nexus. *THE STRAITS* is a poetic investigatory tour de force that stands alongside Mark Nowak's *SHUT UP / SHUT DOWN* as to how 'experimental narrative works can enter this scene as cultural forces or vectors that provide other narrative structures for imagining places and histories...towards a cultural imaging of "Another World"(Jeff Derksen)"--Rodrigo Toscano. Twenty-something Sammy Joyce--hypochondriac, klutz, jumper-to-conclusions--is in the White House as a health-care advisor to the newly elected administration. Everything seems to be falling into place for her. However, soon after taking office, the administration finds itself deep in a red-hot scandal. President Wye's old problem with the bottle re-emerges. An informant within the administration begins leaking damaging information. On top of it all, a secret deal with an Indian pharmaceutical company for an experimental drug unleashes a fury that threatens to shake the administration to its core. Sammy fights to distance herself from the turmoil that surrounds her personally and professionally, but just when she needs boyfriend Charlie more than ever, he gets promoted and moves to New York. Can she hold her ground when her relationships, ideals, and most importantly, her ability to trust are all coming apart at the seams?--From publisher description.

This exciting book is the first systematic study of how international environmental agreements are transformed into political action in Russia. This book blends international relations and gender history to provide a new understanding of the Spanish-American and Philippine-American wars. Kristin L. Hoganson shows how gendered ideas about citizenship and political leadership influenced jingoist political leaders' desire to wage these conflicts, and she traces how they manipulated ideas about gender to embroil the nation in war. She argues that racial beliefs were only part of the cultural framework

that undergirded U.S. martial policies at the turn of the century. Gender beliefs, often working in tandem with racial beliefs, affected the rise and fall of the nation's imperialist impulse. During May 1968, students and workers in France united in the biggest strike and the largest mass movement in French history. Protesting capitalism, American imperialism, and Gaullism, 9 million people from all walks of life, from shipbuilders to department store clerks, stopped working. The nation was paralyzed—no sector of the workplace was untouched. Yet, just thirty years later, the mainstream image of May '68 in France has become that of a mellow youth revolt, a cultural transformation stripped of its violence and profound sociopolitical implications. Kristin Ross shows how the current official memory of May '68 came to serve a political agenda antithetical to the movement's aspirations. She examines the roles played by sociologists, repentant ex-student leaders, and the mainstream media in giving what was a political event a predominantly cultural and ethical meaning. Recovering the political language of May '68 through the tracts, pamphlets, and documentary film footage of the era, Ross reveals how the original movement, concerned above all with the question of equality, gained a new and counterfeit history, one that erased police violence and the deaths of participants, removed workers from the picture, and eliminated all traces of anti-Americanism, anti-imperialism, and the influences of Algeria and Vietnam. *May '68 and Its Afterlives* is especially timely given the rise of a new mass political movement opposing global capitalism, from labor strikes and anti-McDonald's protests in France to the demonstrations against the World Trade Organization in Seattle.

Only ten to twelve percent of Americans would voluntarily live within a mile of a nuclear plant or hazardous waste facility. But industry spokespersons claim that such risk aversion represents ignorance and paranoia, and they lament that citizen protests have delayed valuable projects and increased their costs. Who is right? In *Risk and Rationality*, Kristin Shrader-Frechette argues that neither charges of irresponsible endangerment nor countercharges of scientific illiteracy frame the issues properly. She examines the debate over methodological norms for risk evaluation and finds analysts arrayed in a spectrum. Points of view extend from cultural relativists who believe that any risk can be justified (since no rational standards are ultimately possible) to naive positivists who believe that risk evaluation can be objective, neutral, and value free. Both camps, she argues, are wrong, because risk evaluation as a social process is rational and objective, even though all risk-evaluation rules are value-laden. Shrader-Frechette defends a middle position called "scientific proceduralism." She shows why extremist views are unreliable, reveals misconceptions underlying current risk-evaluation methods and strategies, and sketches the reforms needed to set hazard assessment and risk evaluation on a publicly defensible foundation. These reforms involve mathematical, economic, ethical, and legal procedures. They constitute a new paradigm for assessment when acceptance of public hazards is rational, recognizing that laypersons are often more rational in their evaluation of societal risks than either experts or governments have acknowledged. Such reforms would provide citizens with more influence in risk decisions and focus on mediating ethical conflicts, rather than seeking to impose the will of experts. Science, she argues, need not preclude democracy. Only ten to twelve percent of Americans would voluntarily live within a mile of a nuclear plant or hazardous waste facility. But industry spokespersons claim that such risk

Science, she argues, need not preclude democracy. "Classical works have for us become covered with the glassy armor of familiarity," wrote Victor Shklovsky in 1914. Here Kristin Thompson "defamiliarizes" the reader with eleven different films. Developing the technique formulated in her Eisenstein's *Ivan the Terrible* (Princeton, 1981), she clearly demonstrates the flexibility of the neoformalist approach. She argues that critics often use cut-and-dried methods and choose films that easily fit those methods. Neoformalism, on the other hand, encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually. Thompson's analyses are thus refreshingly varied and revealing, ranging from an ordinary Hollywood film, *Terror by Night*, to such masterpieces as *Late Spring* and *Lancelot du Lac*. She proposes a formal historical way of dealing with realism, using *Bicycle Thieves* and *The Rules of the Game* as examples. *Stage Fright* and *Laura* provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations. Other chapters deal with Tati's *Les Vacances de Monsieur Hulot* and *Play Time* and Godard's *Tout va bien* and *Sauve qui peut (la vie)*. Although neoformalist analysis is a rigorous, distinctive approach, it avoids extensive specialized vocabulary and esoteric concepts: the essays here can be read separately by those interested in the individual films. The book's overall purpose, however, goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole. This is the authoritative guide to conducting the Mindful Self-Compassion (MSC) program, which provides powerful tools for coping with life challenges and enhancing emotional well-being. MSC codevelopers Christopher Germer and Kristin Neff review relevant theory and research and describe the program's unique pedagogy. Readers are taken step by step through facilitating each of the eight sessions and the accompanying full-day retreat. Detailed vignettes illustrate not only how to teach the course's didactic and experiential content, but also how to engage with participants, manage group processes, and overcome common obstacles. The final section of the book describes how to integrate self-compassion into psychotherapy. Purchasers get access to a companion website with downloadable audio recordings of the guided meditations. Note: This book is not intended to replace formal training for teaching the MSC program. See also two related resources for MSC participants and general readers, The Mindful Self-Compassion Workbook, by Kristin Neff and Christopher Germer, and The Mindful Path to Self-Compassion, by Christopher Germer. Poetry. Essays. Much admired by her contemporaries for her experiments in poetic form, Kristin Prevallet now turns those gifts to the most vulnerable moments of her own life, and in doing so, has produced a testament that is both disconsolate and powerful. Meditating on her father's unexplained suicide, Prevallet alternates between the clinical language of the crime report and the lyricism of the elegy. Throughout, she offers a defiant refusal of easy consolations or redemptions. Driven by "the need to extend beyond the personal and out toward the intolerable present," Prevallet brings herself and her readers to the chilling but transcendent place where, as she promises, "darkness has its own resolutions." According to Fanny Howe, here elegy and essay "converge and there is left a beautiful sense of the poetic itself as all that is left to comfort a person facing a catastrophic loss." "This is the quietest and most intimate book by one of our best poets"--Forest Gander. A lively, original study of the work of Peter Paul Rubens. Text by Jennifer Gross. Provides guidance for using podcasting as a motivating educational tool, covering the basic technical process and presenting several lesson plans. In this ground-breaking book, Zapalac brings together the methods of social, intellectual, and art history in showing how the Protestant Reformation altered the terms of political discourse in a German free imperial city. In Zapalac's view, visual and verbal images, many of them having their origins in conceptions of the sacred, were more central to sixteenth-century political thought within the city walls than was the rationalized language of law. Drawing on a wealth of sources, she traces the impact of religious change on the languages of judgment and authority used in the city of Regensburg, and thereby sheds light on the nature of political thought in early modern Germany.
