Balanced Scorecard rafforza il risanamento aziendale Jan 10 2021 La Balanced Scorecard è uno strumento di controllo strategico che può essere di validissimo aiuto nella predisposizione del piano di risanamento di impresa. Grazie all'individuazione dei fattori critici di successo e ai correlati indicatori di performance aziendali, questo strumento garantisce l'affidabilità del piano e sorveglia la sua tenuta nel tempo. In caso di crisi, le due principali figure professionali su cui ci si affida per realizzare il piano industriale di risanamento sono il consulente (per la sua elaborazione) e l'attestatore (per garantirne l'autenticità). Con l'ausilio della Balanced Scorecard questi soggetti disporranno di una quantità e varietà di informazioni tali da poter aiutare l'impresa con più efficacia nella ricerca del ritorno al valore. Lo stesso attestatore potrà valutare con maggior successo il rispetto dei principi di attendibilità e affidabilità del piano, dato che con la Balanced Scorecard non saranno solo le informazioni di

natura strettamente economica, finanziaria e patrimoniale a favorire la verifica della complessiva fattibilità del piano, ma anche un sistema di indicatori di performance che monitorizza nel tempo l'andamento generale dell'azienda e la coerenza del sistema di controllo direzionale con le strategie attuate dai managers. Grazie all'applicazione della Balanced Scorecard nello sviluppo di un piano di risanamento, vedrà la luce un rinnovato percorso logico: dalla definizione delle variabili chiave, al ritorno alla creazione di valore; dalla costruzione del sistema di reporting aziendale, al monitoraggio del piano di risanamento. Il libro ha l'obiettivo di suggerire un nuovo metodo di lavoro, in grado di irrobustire la definizione e l'implementazione della strategia aziendale, nei contesti di crisi e non solo, facilitando nel loro lavoro sia l'advisor che l'attestatore, considerando anche i recenti principi di attestazione del piano di risanamento. Il libro è destinato ai managers, agli imprenditori, ai

professionisti incaricati di elaborare il piano (gli advisors) e di garantirne l'autenticità (gli attestatori). STRUTTURA 1. Il modello balanced scorecard 2. The Gender Pay Gap and Social Partnership in Europe Aug 05 2020 The gender pay gap (GPG) exists in every European country, but it varies considerably, even in EU member states covered by the same legal principles on pay equality. Part of the variation can be explained by different patterns of social partnership. With current policy pressure to de-centralise collective bargaining and increase the percentage of pay linked to productivity, what role can social partnership play in tackling the GPG? Reporting on the findings of the European Commission funded research project "Close the Deal, Fill the Gap", this book uses an interdisciplinary analysis involving legal, economic, and sociological expertise, to explore the role of social partnership in GPG in Italy, Poland and the UK. Selected on the basis of their

contrasting profiles in terms of legal regulation, industrial relations, systems of collective bargaining, coverage of collective agreements, and differing rates of the GPG, the in-depth study provides important insights into the main issues underlying the problem of reducing the gender pay gap which have led to guidelines in the negotiation of arrangements on GPG-related issues. Based on a unique comparative, interdisciplinary and action-oriented research project, it will be of great interest to all researchers and advanced students with an interest in women's representation in the workforce and the gender pay gap, as well as practitioners and policy makers in organisations such as trade unions and employers' associations.

The History and Tradition of Accounting in Italy

Nov 19 2021 Italian accounting has a long and honourable tradition of theoretical and applied analysis of the accounting and reporting function, perceived and defined much more broadly than in the Anglo-Saxon tradition. The high point of this perhaps, is the creation of what is known as *Economia Aziendale* (EA). The

antecedents, genesis and later developments are presented here in detail by highly knowledgeable specialists in the field. EA takes as a prerequisite the necessity of the business (entity/*azienda*) to ensure its own long-run survival. This requires that the necessary resources are retained and preserved, so operating capital maintenance, by definition future-oriented, is essential. It requires a focus on the particular business organization, entity-specific and consistent with today's notion of the business model. Entity-specific information relevant to current and future cash flows is a necessary pre-requisite for ensuring long-run survival, which historical cost accounting, or fair value (being market-specific not entity-specific) satisfactorily achieve. Flexibility of valuation and of reporting, always relevant to the specific asset at the specific time in the specific place, is a necessary condition for effective management. This is exactly the focus of EA and its analysis and tradition. Scholars and advanced students of

international regulation and accounting, as well as accounting history, will find this an invaluable guide to a vibrant, scholarly tradition of great practical relevance today.
