*Yes, it's true: you can learn how to be a verbal wizard! Ever hear someone utter an unforgettable phrase and feel yourself reacting with with...well, awe? Ever read a great quote and think I could never come up with anything that clever? Daunting as it may seem, there's nothing mystical about witcraft. Crafting memorable lines*

*doesn't require DNA-encoded brilliance. What it does require is some knowledge of the tricks and techniques that make words stick. In Word Hero, Jay Heinrichs rescues the how-to of verbal artistry from cobwebbed textbooks and makes it entirely fresh— even a little mischievous. Fear not: on offer here are not dry, abstract ideas couched in academic jargon. Rather, Heinrichs takes you on an amusing – and amazingly helpful – tour of the mechanisms that make powerful language work. You'll learn how to slyly plant your words in people's heads and draw indelible verbal pictures by employing such tools as "crashing symbols," "rapid repeaters," "Russian Dolls" and even the powers of Mr. Potato Head. With those tools and others tucked in your utility belt, you might not immediately achieve "wordsmith immortality" but you will become a better speaker, writer, and raconteur...and long after people have forgotten everything else, they'll remember your priceless lines. A compendium of crafting inspiration and instruction from the creators of ABC's competition series Making It—featuring twenty-five projects. With the all-star duo of Amy Poehler and Nick Offerman leading the way with puns, advice, and good vibes, Making It became the competition series we didn't know we needed, stealing our hearts and encouraging our most creative ideas. Now the show's creators are at it again with this in-depth looks at some of the best DIY crafts from the show and inspired by the Makers themselves. Introductions to woodworking, fiber arts, paper crafts, and more will enable you to experiment and customize your own creations at home. And the projects are accessible to all skill levels, so you can get just as crafty as the Makers did. This crafting guide will inspire and energize you to DIY whatever you put your mind to. *braiding, knotting and lace is presented in this lavishly illustrated volume written by leading specialists from Austria, Canada, Denmark, France, Germany, Sweden, Switzerland, the UK, and USA. Drawing inspiration from the pioneering work of Peter Collingwood, this publication explores aspects of these craft skills in the prehistoric, Roman, and medieval world through scientific, object-based analysis and 'research through making'. Chapters include the growth of patterned tablet weaving for trimming garments in prehistoric Central Europe; recently identified styles of headdress worn in the Roman Rhineland and pre-Islamic Egypt; Viking-age Dublin as a production center for tablet-woven bands; a new interpretation of the weaving technique used to make luxurious gold bands in the twelfth to late thirteenth centuries; and the development out of plaiting of bobbin lace borders in gold and silver threads from the fifteenth to early seventeenth centuries. Practical experiments test methods of hand spinning and the production of figure-hugging hose in ancient Greece and Renaissance Italy. A typology of braid and knotting structures in late medieval Europe is also set out for the first time. Diagrams, illustrations, and photographs enrich each chapter with a wealth of visual source material. The work is the outcome of recent discoveries of archaeological textile finds from excavations as well as fresh examination of material recovered in the past, or preserved in treasuries. Early textiles form an increasingly popular subject of interest and this publication, which is a landmark in the study of various specialized textile techniques, aims to provide the reader with a better understanding of these virtuoso craft skills in antiquity. What better time to dive into this venerable and unique hobby than now? In Europe, Indian hobbyism, or Indianism, has developed out of a strong fascination with Native American life in the 18th and 19th centuries. 'Indian hobbyists' dress in homemade replicas of clothing, craft museum-quality replicas of artifacts, meet in fields dotted with teepees and re-enact aspects of the North American Indian lifestyle, using ethnographies, travel diaries, and museum collections as resources. Grounded in fieldwork set among networks of Indian hobbyists in Germany, the Netherlands, Belgium, France, and the Czech Republic, this ethnography analyzes this contemporary practice of serious leisure with respect to the general human desire for play, metaphor, and allusion. It provides insights into the increasing popularity of re-enactment practices as they relate to a deeper understanding of human perception, imagination, and creativity. The last decades of the Ming dynasty, though plagued by chaos and destruction, saw a significant increase of publications that examined advances in knowledge and technology. Among the*

numerous guides and reference books that appeared during this period was a series of texts by Song Yingxing (1587–1666?), a minor local official living in southern China. His *Tiangong kaiwu*, the longest and most prominent of these works, documents the extraction and processing of raw materials and the manufacture of goods essential to everyday life, from yeast and wine to paper and ink to boats, carts, and firearms. In *The Crafting of the 10,000 Things*, Dagmar Schäfer probes this fascinating text and the legacy of its author to shed new light on the development of scientific thinking in China, the purpose of technical writing, and its role in and effects on Chinese history. Meticulously unfolding the layers of Song's personal and cultural life, Schäfer chronicles the factors that motivated Song to transform practical knowledge into written culture. She then examines how Song gained, assessed, and ultimately presented knowledge, and in doing so articulates this era's approaches to rationality, truth, and belief in the study of nature and culture alike. Finally, Schäfer places Song's efforts in conjunction with the work of other Chinese philosophers and writers, before, during, and after his time, and argues that these writings demonstrate collectively a uniquely Chinese way of authorizing technology as a legitimate field of scholarly concern and philosophical knowledge. Offering an overview of a thousand years of scholarship, *The Crafting of the 10,000 Things* explains the role of technology and crafts in a culture that had an outstandingly successful tradition in this field and was a crucial influence on the technical development of Europe on the eve of the Industrial Revolution. Over the course of the nineteenth century, women in Britain participated in diverse and prolific forms of artistic labour. As they created objects and commodities that blurred

*the boundaries between domestic and fine art production, they crafted subjectivities for themselves as creative workers. By bringing together work by scholars of literature, painting, music, craft and the plastic arts, this collection argues that the constructed and contested nature of the female artistic professional was a notable aspect of debates about aesthetic value and the impact of industrial technologies. All the essays in this volume set up a productive inter-art dialogue that complicates conventional binary divisions such as amateur and professional, public and private, artistry and industry in order to provide a more nuanced understanding of the relationship between gender, artistic labour and creativity in the period. Ultimately, how women faced the pragmatics of their own creative labour as they pursued vocations, trades and professions in the literary marketplace and related art-industries reveals the different ideological positions surrounding the transition of women from industrious amateurism to professional artistry. \* Everything you need to know about crafting. \*With Crafting being one of the most important functions of mine craft, new players often get confused since you have to follow simple recipes to create tools and other items that ensure survival. (Also includes a guide to crafting using redstone) Crafting Identity goes far beyond folklore in its ethnographic exploration of mask making in central Mexico. In addition to examining larger theoretical issues about indigenous and mestizo identity and cultural citizenship as represented through masks and festivals, the book also examines how dominant institutions of cultural production (art, media, and tourism) mediate Mexican "arte popular," which makes Mexican indigeneity*

*“digestible” from the standpoint of elite and popular Mexican nationalism and American and global markets for folklore. The first ethnographic study of its kind, the book examines how indigenous and mestizo mask makers, both popular and elite, view and contest relations of power and inequality through their craft. Using data from his interviews with mask makers, collectors, museum curators, editors, and others, Pavel Shlossberg places the artisans within the larger context of their relationships with the nation-state and Mexican elites, as well as with the production cultures that inform international arts and crafts markets. In exploring the connection of mask making to capitalism, the book examines the symbolic and material pressures brought to bear on Mexican artisans to embody and enact self-racializing stereotypes and the performance of stigmatized indigenous identities. Shlossberg’s weaving of ethnographic data and cultural theory demystifies the way mask makers ascribe meaning to their practices and illuminates how these practices are influenced by state and cultural institutions. Demonstrating how the practice of mask making negotiates ethnoracial identity with regard to the Mexican state and the United States, Shlossberg shows how it derives meaning, value, and economic worth in the eyes of the state and cultural institutions that mediate between the mask maker and the market.
