Breast cancer surgeon Dr. Kristi Funk offers a comprehensive and encouraging approach to breast care and breast cancer. Empower yourself with facts and strategies to understand your breasts, reduce your cancer risk, and open your eyes to interventions and treatments. Most women don't want to hear about breast cancer unless they have it and need to make some decisions, but these days news about breast cancer—the number one killer of women ages twenty to fifty-nine—is everywhere. Chances are you know someone who has had it. But did you know that choices you make every day bring you closer to breast cancer—or move you farther away? That there are ways to reduce your risk factors? And that many of the things you've heard regarding the causes of breast cancer are flat-out false? Based on Dr. Kristi Funk's experience as a board-certified breast cancer surgeon, she knows for a fact that women have the power to reduce breast cancer risk in dramatic ways. Many women believe that family history and genetics determine who gets breast cancer, but that's not true for most people. In fact, 87 percent of women diagnosed with breast cancer do not have a single first-degree relative with breast cancer. This book will help you: Learn the breast-health basics that every woman should know Reduce your cancer risk and recurrence risk based on food choices and healthy lifestyle changes backed by rigorous scientific research Understand the controllable and uncontrollable risk factors for breast cancer Outline your medical choices if you're at elevated risk for or are already navigating life with breast cancer There have been few solid guidelines on how to improve your breast health, lower your risk of getting cancer, and make informed medical choices after treatment—until now. With her book available in 10 languages and in more than 30 countries, Dr. Funk is passionate about her mission of educating as many women as possible about what they can do to stop breast cancer before it starts. Professors: Order your exam copy today by clicking on the &BAD:"Request an Exam Copy&BAD:" link above. Would you teach someone to play basketball using just chalkboard diagrams? Or would you get them on the court and have them play? In basketball, the answer is easy&BAD:—you do both. So why teach politics only as a spectator sport? Senator Bob Graham believes that students should expand on their classroom learning about the political system: he spurs them to hit the court and actually play the game. If students work on an issue they care about, politics will become a meaningful and positive experience. This short, how-to guide takes students out of theoretical discussions of policy and into a world where they can affect change. Graham&BAD:'s goal is to have students identify a problem, and then walk them through each step from researching the issue, to getting others involved, to engaging the media. Each chapter starts with a real case, showing citizens tackling a step in the process, and ends with a summary checklist and a series of questions that help students put Graham&BAD:'s game plan in action. By offering students concrete guidance, an array of resources, and advice for troubleshooting and overcoming barriers, this compact user&BAD:'s guide gets students way beyond textbook learning. Thirty-five years ago, as a member of the Florida Legislature, Bob Graham took on the challenge of civic education for eighteen weeks at a Miami-area high school. His time as both a governor and a senator has only strengthened his resolve to pique students&BAD:' curiosity about politics and teach them to get what they want from government. King Alfred is perhaps best remembered for allowing cakes to become burnt, but he did something far more significant and of lasting value. He used ten commandments, given to the Jewish people centuries before, as the foundation of English law. He instinctively knew they contained the recipe for a safe and successful society. The secret they all contain is respect. Respect for God first, for his uniqueness, his nature, his name, his special day; then respect for each other, our families, life itself, marriage, property and reputation. Churches have urged members to memorise the Ten Commandments, along with the Lord's Prayer and the Apostles' Creed, often putting all three up on the wall as summaries of the Christian faith and life, as well as using them in worship. But how can principles laid down so long ago and so far away be relevant to contemporary society? Well, as one New Testament translator (J B Phillips) puts it: 'By the straight edge of God's law we find out how crooked we are.' Only after this discovery are we ready to consider the gospel of Jesus. The Maker's Manual is a practical and comprehensive guide to becoming a hero of the new industrial revolution. "You can't always get what you want"—but you can. Much of what we hear about ourselves and the world... "No pain, no gain"; "It's a dog-eat-dog world"; "Either you got it or you don't"—isn't true when we understand our nature and how to operate to reach our maximum potential. But how many of us understand our own design specs? Refrigerators come with instruction manuals—why not people? Here at last is the manual that should have come with you at birth. And it turns out that life is a lot easier than we've been taught. Living in alignment with your true nature—the path of least resistance—brings you all the joy, abundance and health your Manufacturer intended you to have! When a golfer has trouble with a swing, it's not because she doesn't deserve to play golf, or golf hates her, or she'll never be any good at golf, or anything like that. It's simply that her swing (behavior) is not yet in alignment with her biodynamics for that swing. With a little coaching, she can align with her body's nature and the stroke becomes easy, even effortless. The same alignment to effortlessness can happen in every area of your life! Use the tools and techniques in this book to help you align with natural, physical, and spiritual laws for joy, purpose, and vitality while living your dreams. A practical and comprehensive guide to becoming a hero of the new industrial revolution. It's common for homeowners to have 2- or 4-cycle small engines in their lawn and garden equipment, utility vehicles, recreational vehicles, generators and other machines. With this easy-to-follow, richly illustrated handbook, homeowners will be able to understanding small engines, troubleshooting them

and working on them. The book has a brief history of significant and popular small engines and a guide to setting up a home workshop in which to work on them. It also includes case studies on the disassembly, maintenance, repair and/or rebuilding of: a 2-stroke lawnmower engine, a 4-stroke utility motor, a 2-stroke chainsaw engine, and a curbside junker. The writing is lively and entertaining and the color photos clearly show how to work on these useful engines. In 2016, Americans fed up with the political process vented that frustration with their votes. Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade. Democrats nearly selected a self-described socialist who ran on a populist platform against the influence of big money in politics. While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual, the truth is that we don't have to pin our hopes for greater participation on any one candidate. All of us have a say—if we learn, master and practice the skills of effective citizenship. One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can't fight City Hall. That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn't care what people like them thought. Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles. They describe effective citizenship skills and provide tips from civic experts. Even more importantly, they offer numerous examples of everyday Americans who have used their skills to make democracy respond. The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy. By the end of the book, you will have new confidence that citizen participation is the lifeblood of America -- and will be ready to make governments work for you, not the other way around. Introduced in 1961, the Gibson SG is Gibson's biggest-selling guitar of all time, and is synonymous with Angus Young (AC/DC lead guitarist), Tony Iommi (Black Sabbath) and Robby Krieger (The Doors). The SG was originally produced as a more easily manufactured 'mass-production' version of the Les Paul, sales of which were diminishing at the time, but the solid-bodied SG ('Solid Guitar') soon became a revered instrument in its own right. Superbly illustrated and designed, this manual includes case studies of key models – everything from a vintage SG 'Les Paul' to a 2011 SG 50th Anniversary model – but also gives appropriate attention to today's affordable Epiphone versions, Specials, Juniors and Melody Makers. Change a taillight bulb Jump-start a car Most believers know that the Bible says "...for we wrestle not against flesh and blood..." But, if we say that "we know this," then why are there so many believers, made of flesh and blood, blaming, resenting and fighting one another? Maybe it's because we are not realizing enough that those negative "thoughts and feelings" do not come "just from us..." but from living beings that are unseen. We are not realizing enough that unholy thoughts, feelings, desires and reasons did not originate "from us" or from what is said to be "our sinful nature..." just as holiness does not originate "from us." If our holiness comes from the Holy Spirit, would our unholiness not also come from unholyspirits? I submit that we do not understand enough "the sin that dwells in the flesh." It is alive, and does what we do not want to do... unless we recognize the real, spiritual enemies behind "the flesh." Miguel Demelli is a Spirit-filled believer who also embraces the Hebraic roots of the Messiah and the Whole House of Israel (Ezekiel 37:15-28). He's been searching for the "keys to victory" for 15 years. And just when he thought he was defeated forever, these simple truths were clarified to him and transformed his walk...forever. His desire is to see true unity and victory in the Body. But, as he found out for himself, this cannot happen as long as there is so much hidden, unrecognized enemy activity in and through us operating against ourselves and then against one another, resulting in much strife and even diseases. He presently splits his time as a translator in his local congregation, as Spanish Outreach Coordinator/Translator for the Messianic Israel Alliance in the US and Mexico, as an associate with wholeness ministries and with other personal ministry and translation opportunities. He currently resides in Orlando, Florida. Cover Illustration by Rosemary Burke (c) 2009
