digital filmmaking! The EDCF Guide to Digital Cinema Production sheds light on the ongoing and confusing transition from analog to digital technology in film production. In addition to a complete analysis of technical concerns, this text deals with a number of issues where European and Hollywood priorities differ. It adds fuel to the discussion on "Photo-Chemical Fundamentalism" and the future of traditional film-based cinematography. With special emphasis on new HD production techniques for the big cinema screen, this guide is the one and only resource available from a European perspective. The EDCF Guide to Digital Cinema Production provides film professionals and decisions-makers in European cinema with an excellent basis for discussions on how to handle the transition from analog to digital technology. Look no further for: * Several production case studies, among them Ingmar Bergman's last film "Saraband" (2003) and Lars von Trier's "Dogville" (2003). * Surveys of HD Systems & Cameras and "The 37 MFAQ on HD Production." * Expert reports on Audio Recording for HD and the Digital Intermediate Process. * Detailed European initiatives in Digital Cinema. * An up-to-date survey of the problematic standards situation for Digital Cinema. * A comprehensive look at archiving - the "Achilles Heel" of digital production. * The pros and cons of producing feature films digitally - a unique and professional view of "the agony and ecstasy." Editor-in-Chief Lasse Svanberg is a founding member of EDCF. He was DoP on 14 feature films 1966-81, founded TM (Technology & Man) Magazine at the Swedish Film Institute in 1968 and was its Chief Editor until 1998 He was elected Fellow of BKSTS 1979, Fellow of SMPTE 1995 and granted Professor's title by the Swedish Government 2002. He is the author of six books on the history and possible future of film, video and television. The European Digital Cinema Forum (EDCF) was constituted in June 2001 as joint Swedish-British-French effort to establish a European forum for discussions, information exchange and industrial activities in the field of Digital Cinema. This project was initiated because digital production, digital distribution and digital exhibition of film is the most radical technical change facing the film industry since sound film was

This book constitutes the thoroughly refereed post-conference proceedings of the COST Action 2102 and euCognition supported international school on Multimodal Signals: 'Cognitive and Algorithmic Issues' held in Vietri sul Mare, Italy, in April 2008. The 34 revised full papers presented were carefully reviewed and selected from participants' contributions and invited lectures given at the workshop. The volume is organized in two parts; the first on Interactive and Unsupervised Multimodal Systems contains 14 papers. The papers deal with the

theoretical and computational issue of defining algorithms, programming languages, and determinist models to recognize and synthesize multimodal signals. These are facial and vocal expressions of emotions, tones of voice, gestures, eye contact, spatial arrangements, patterns of touch, expressive movements, writing patterns, and cultural differences, in anticipation of the implementation of intelligent avatars and interactive dialogue systems that could be exploited to improve user access to future telecommunication services. The second part of the volume, on Verbal and Nonverbal Communication Signals, presents 20 original studies devoted to the modeling of timing synchronisation between speech production, gestures, facial and head movements in human communicative expressions and on their mutual contribution for an effective communication. To make great animation, you need to know how to control a whole world: how to make a character, how to make that character live and be happy or sad. You need to create four walls around them, a landscape, the sun and moon - a whole life for them. You have to get inside that puppet and first make it live, then make it perform. Susannah Shaw provides the first truly practical introduction to the craft skills of model animation. This is a vital book in the development of model animation which, following the success of Aardman's first full-length film, Chicken Run, is now at the forefront of modern animation. Illustrated in full colour throughout you are shown step by step how to create successful model animation. Starting with some basic exercises, you will learn about developing a story, making models, creating set and props, the mechanics of movement, filming, postproduction and how to set about finding that elusive first job in a modern studio. Susannah Shaw is Programme Development Manager for the Animated Exeter festival. She was head of the Bristol Animation Course from 1996 to 2000 at the University of the West of England and former camera assistant at Aardman (working on 'A Close Shave' among other films).
