**Inventing the Jew** Jul 11 2021

Inventing the Jew follows the evolution of stereotypes of Jews from the level of traditional Romanian and other Central-East European cultures (their legends, fairy tales, ballads, carols, anecdotes, superstitions, and iconographic representations) to that of "high" cultures (including literature, essays, journalism, and sociopolitical writings), showing how motifs specific to "folkloric antisemitism" migrated to "intellectual antisemitism." This comparative perspective also highlights how the images of Jews have differed from that of other "strangers" such as Hungarians, Germans, Roma, Turks.

**El hotel de los corazones solitarios** May 28 2020 "José Agustín es una de las más notables manifestaciones del rock mexicano, probablemente mucho más potente y más significativa que buena parte de las bandas que han surgido en este país" RULO, tomado del prólogo José Agustín es una de las plumas más potentes de la literatura mexicana, representante de una generación de escritores cuyas letras fueron el instrumento ideal para dar voz a una época marcada por el rock, la psicodelia y el relajó. Este volumen, primero de una serie de textos poco conocidos del autor, reúne crónicas y ensayos de José Agustín. Del blues del Misisipi a las tornamesas de Tijuana, de la melancolía de José Alfredo al cine de Orson Welles, José Agustín explora con su libertad y estilo característicos los derroteros de la música, las letras y, por qué no, del cine para ofrecer al lector un atisbo a su visión personalísima del mundo. El resultado es un libro ecléctico

y desmadroso, cuyo eje es la pasión incansable que su autor tiene por la música y la palabra.

*Three Perspectives of Anthroposophy* Jun 21 2022

What is truly real? Rudolf Steiner sheds light on everyday reality through spiritual knowledge, repeatedly urging us to bring anthroposophy into daily human existence. We might consciously experience the difference between consuming a potato as compared to cereals such as rye, for example - or we could grasp ordinary phenomena, such as sleepwalking, through an understanding of the threefold human being. Likewise, we might strive to comprehend how our head is the transformed organism of our previous life. Throughout, Steiner emphasizes that we can achieve spirituality on earth if only we make anthroposophy real. The twelve lectures here were delivered during the portentous year of 1923, in the context of increasing attacks from Steiner's opponents. His architectural masterpiece, the

first Goetheanum, had already been destroyed by fire, but he was yet to refound the Anthroposophical Society at the Christmas Conference. In these uncertain times, Steiner speaks of the decline of European culture and the development of materialism as a philosophy, leaving anthroposophy with no exoteric foundation on which to build. But Rudolf Steiner strikes a positive note with an exciting and constructive way forward, providing us with the tools to see the world through three key perspectives of anthroposophy: the physical, the soul and the spiritual dimensions of reality. This previously-unpublished volume is translated by Elizabeth Marshall and includes an introduction, notes and index.

Critical Brass Jan 17 2022

Critical Brass tells the story of neofanfarrismo, an explosive carnival brass band community turned activist musical movement in Rio de Janeiro, as Brazil shifted from a country on

the rise in the 2000s to one beset by various crises in the 2010s. Though predominantly middle-class, neofanfaristas have creatively adapted the critical theories of carnival to militate for a more democratic city. Illuminating the tangible obstacles to musical movement building, Andrew Snyder argues that festive activism with privileged origins can promote real alternatives to the neoliberal city, but meets many limits and contradictions in a society marked by diverse inequalities. -- Salwa El-Shawan Castelo-Branco, Professor Emerita, NOVA University of Lisbon

**Soundscapes of the Urban Past** Feb 03 2021

We cannot simply listen to our urban past. Yet we encounter a rich cultural heritage of city sounds presented in text, radio and film. How can such »staged sounds« express the changing identities of cities? This volume presents a collection of studies on the staging of Amsterdam, Berlin and London soundscapes in historical documents, radio plays and films, and offers insights into themes such as film sound theory and museum audio guides. In doing so, this book puts contemporary controversies on urban sound in historical perspective, and contextualises iconic presentations of cities. It addresses academics, students, and museum workers alike.

With contributions by Jasper Aalbers, Karin Bijsterveld, Carolyn Birdsall, Ross Brown, Andrew Crisell, Andreas Fickers, Annelies Jacobs, Evi Karathanasopoulou, Patricia Pisters, Holger Schulze, Mark M. Smith and Jonathan Sterne.

**The Thoughtful Chef** Aug 31 2020 The Thoughtful Chef is a culmination of eclectic recipes from over the last 20 of her 44 years of Lisa's professional cooking. It is also mostly gluten-free but can also be easily replaced with regular flour wherever it's used. As a child, Lisa always had an interest in cooking but never thought it would become her lifetime career. Her mother began involving her in the daily kitchen tasks at the age of 10, earning money by helping her prepare dinner, and by the time Lisa was 16 years old, she was shopping, meal planning, cooking, and all on a budget of 60 dollars a week for 4 people. Lisa's professional career began when she took a job as a waitress when she was 20 years old at The Good Earth in Westwood, California. She

loved the high energy of the restaurant business and was immediately drawn to the professional kitchen. The head cook, Kevin McKenzie gave her a chance and Lisa never looked back. Lisa's need to be creative and physical at what she wanted to do in life was a priority and this satisfied these needs more than she ever dreamed it would. Lisa has cooked in some of the greatest restaurants in Los Angeles. As luck would have it, her first apprenticeship was at Ma Maison under Wolfgang Puck in 1979, the most infamous restaurant that catered mostly to the stars. This is where she fell in love with food. In 1980, Lisa went on to L'Orangerie, a very elegant and highly acclaimed restaurant, as her second apprenticeship. She then worked briefly under Ken Frank of La Toque in 1982, another highly acclaimed restaurant and well-known chef. Lisa's most notable job was when Kevin from The Good Earth tipped her off at an opening as a line cook at Spago, Sunset while finishing

her last shift at La Toque. She ran over there as La Toque was only a few miles from Spago and got the job. Spago was hugely popular, boasting one of the first open kitchens in the country. After 2 years, Lisa became Wolfgang's head chef in 1986, her greatest accomplishment to date. "I loved the open kitchen because I could see the smiles on people's faces as they ate." Lisa says. Then in 1993, Lisa had an opportunity to open a restaurant in Malibu called, Bambu, as executive chef, and partner. Bambu and Lisa were an instant success from day one which also featured a sushi bar along with Lisa's eclectic, no fuss, farm to table, and healthy cuisine. While there, she won awards for one of the Top 100 Chef's in America, bringing innovative ideas into the new millennium, in 1995, 1996, and 1997. After Bambu, Lisa was discovered by Paul Newman in 1998, recruiting her to consult for Newman's Own, creating 2 sauces and writing 2 cookbooks for the company. After this, Lisa

started Lucky Girl Catering in 2001, which became The Malibu Chef in 2005 and still going strong in 2022. She is also the creator and CEO of Butter Barn butter, a gluten free, non-gmo, grass-fed, organic cookie and brownie company, and sells her products online and at all Erewhon Markets in Los Angeles, as well as some healthier markets around the country. "My passion for cooking and creating is a spiritual experience. It's a meditation that runs deep into my soul. I want the very best of my energy going into the food I cook for my clients, family, and friends. Many have said they feel better after eating my food which is the highest compliment anyone could ever give me. I hope this cookbook translates this feeling to you and your kitchen. I never wanted to look at my work as a job, and blessed as I am, I've never worked a day in my life." Lisa Stalvey-Coady  
*Moroccan Households in the World Economy* Apr 27 2020 In the High Atlas Mountains of

Morocco, far from the hustle and noise of urban centers, lies a village made of mud and rock, barely discernible from the surrounding landscape. Yet a closer look reveals a carefully planned community of homes nestled above the trees, where rock slides are least frequent, and steep terraces of barley fields situated just above spring flood level. The Berber-speaking Muslims who live and farm on these precipitous mountainsides work together at the arduous task of irrigating the fields during the dry season, continuing a long tradition of managing land, labor, and other essential resources collectively. In *Moroccan Households in the World Economy*, David Crawford provides a detailed study of the rhythms of highland Berber life, from the daily routines of making a living in such a demanding environment to the relationships between individuals, the community, and the national economy. Demonstrating a remarkably complete understanding of

every household and person in the village, Crawford traces the intricacies of cooperation between households over time. Employing a calculus known as "arranging the bones," villagers attempt to balance inequality over the long term by accounting for fluctuations in the needs and capacities of each person, household, and family at different stages in its history. Tradition dictates that children "owe" labor to their parents and grandparents as long as they live, and fathers decide when and where the children in their household work. Some may be asked to work for distant religious lodges or urban relatives they haven't met because of a promise made by long-dead ancestors. Others must migrate to cities to work as wage laborers and send their earnings home to support their rural households. While men and women leave their community to work, Morocco and the wider world come to the village in the form of administrators, development agents, and those representing

commercial interests, all with their own agendas and senses of time. Integrating a classic village-level study that nevertheless engages with the realities of contemporary migration, Crawford succinctly summarizes common perceptions and misperceptions about the community while providing a salient critique of the global expansion of capital. In this beautifully observed ethnography, Crawford challenges assumptions about how Western economic processes transfer to other contexts and pulls the reader into an exotic world of smoke-filled kitchens, dirt-floored rooms, and communal rooftop meals -- a world every bit as fascinating as it is instructive.

**Música Soul (Mundodisco 16)** Jul 23 2022 Soul Music es una historia sobre la memoria y el deseo de olvidar. Y también una historia de sexo, drogas y Música con Rocas Dentro. Pero, sobre todo, es la decimosexta entrega de la serie del Mundodisco, del genial Terry Pratchett. Hay una Muerte en la familia. Acaban de recordárselo a Susan, para su desgracia. Porque precisamente ahora la Muerte acaba de desaparecer y ella, su nieta (adoptiva), ha de encargarse del negocio familiar. Sin embargo, pese a montar el caballo blanco y empuñar la guadaña, todos parecen empeñados en querer confundirla con un hada. Y encima, también está esa Música con Rocas Dentro que se está adueñando del Mundodisco. Es nueva. Es pegadiza. Tiene ritmo y se

puede bailar. Está viva...  
Reseña: «Hay un fenómeno en la fantasía que no se llama J. K. Rowling ni Tolkien. Se trata de Terry Pratchett... un astro del género.» El País

Hujan itu adalah proses kondensasi uap air di atmosfer menjadi butiran air yang cukup berat untuk jatuh dan biasanya tiba di daratan. Tapi, hujan itu istimewa maknanya lebih dari apa yang terlihat. Banyak pelajaran yang bisa kita ambil hanya dengan air hujan yang turun dari langit. Hujan mengajarkan kita untuk tidak pernah menyerah meski sudah jatuh berkali kali, meskipun kita gagal, akan selalu ada

jalan untuk mencoba lagi.

Investigations Jun 09 2021 "It may be that I have stumbled upon an adequate description of life itself." These modest yet profound words trumpet an imminent paradigm shift in scientific, economic, and technological thinking. In the tradition of Schrödinger's classic *What Is Life?*, Kauffman's *Investigations* is a tour-de-force exploration of the very essence of life itself, with conclusions that radically undermine the scientific approaches on which modern science rests--the approaches of Newton, Boltzman, Bohr, and Einstein. Building on his pivotal ideas about order and

evolution in complex life systems, Kauffman finds that classical science does not take into account that physical systems--such as people in a biosphere--effect their dynamic environments in addition to being affected by them. These systems act on their own behalf as autonomous agents, but what defines them as such? In other words, what is life? Kauffman supplies a novel answer that goes beyond traditional scientific thinking by defining and explaining autonomous agents and work in the contexts of thermodynamics and of information theory. Much of Investigations unpacks the progressively surprising implications of his definition. Significantly, he sets the stages for a technological revolution in the coming decades. Scientists and engineers may soon seek to create autonomous agents--both organic and mechanical--that can not only construct things and work, but also reproduce themselves! Kauffman also lays out a foundation for a new

concept of organization, and explores the requirements for the emergence of a general biology that will transcend terrestrial biology to seek laws governing biospheres anywhere in the cosmos. Moreover, he presents four candidate laws to explain how autonomous agents co-create their biosphere and the startling idea of a "co-creating" cosmos. A showcase of Kauffman's most fundamental and significant ideas, Investigations presents a new way of thinking about the fundamentals of general biology that will change the way we understand life itself--on this planet and anywhere else in the cosmos.
