Language Acquisition, second edition Apr 17 2022 The new edition of a comprehensive introduction to a rapidly developing field, combining developmental data with theory. How do children begin to use language? How does knowledge of language emerge in early infancy, and how does it grow? This textbook offers a comprehensive introduction to knowledge acquisition, drawing on empirical evidence and linguistic theory. The theoretical framework used is the generative theory of Universal Grammar; students should have some familiarity with concepts in linguistic research. Aimed at upper-level undergraduate and graduate students, the book offers end-of-chapter summaries, key words, study questions, and exercises. This second edition has been thoroughly updated, with new content throughout. It has been reorganized according to the three main components of language acquisition. The computational components and the interfaces are covered in chapters on structure building in the verbal and nominal domains, movement-derived structure, and the relation between syntax and semantics and semantic and pragmatic. The sensory motor interface is treated in chapters on infants' perception of language and on the acquisition of words. The intentional-conceptual interface is discussed in chapters on the acquisition of words. This edition features additional cross-linguistic content, a new focus on brain imaging findings and the motor aspect of language, new material on Williams and Down Syndromes and dyslexia, and a new chapter on bilingualism, early second language acquisition, and bimodalism. Revisions reflect the burgeoning research in the field. New pedagogical features include chapter outlines, summaries of chapters, hypotheses, and linguistic milestones; methodological information; explanatory boxes; and suggestions for further reading.

Chinese-Dutch Business Negotiations May 18 2022 The Chinese are known as an inscrutable people in the West. With the rapid globalisation of world business, China, with its booming economy and as one of the world's largest emerging markets, is attracting increasing numbers of international traders and investors. Various sources have shown that language and culture are, among other factors, two of the major obstacles to successful business collaborations between the Chinese and Westerners. This dissertation aims to help remove these obstacles by offering some insights into the intricate mechanisms of business negotiation between the Chinese and the Dutch. While most of the research concerning Chinese-Western communication has used everyday conversation as the subject of study, this research chooses negotiation, the core of international business, as its subject. Micro-level qualitative discourse analyses are used as the main research method in addition to ethnographic methods such as the questionnaire survey and interview. The main data used are simulated as well as real-life video-taped Chinese-Dutch business negotiations. Questionnaire survey and interview data from real-life Chinese and Dutch negotiators are used as support data. The phenomena recurrently cropping up across the negotiations are examined at a turn-to-turn level to pinpoint places where problems arise that prevent the negotiators from reaching mutual understandings and fulfilling negotiation goals. The deep-rooted cultural concepts underlying the linguistic phenomena prove to be the main trouble sources. The results of this research are relevant for both the academic and business world.

Language Choices Nov 12 2021 This volume is about various aspects of the theory and application of language contact and language conflict phenomena seen from an interdisciplinary perspective. The focus is on the linguistic, social, psychological, and educational issues (conditions, constraints, and consequences) involved in the status and use of languages in multilingual settings. The book is divided into four sections dealing with the following areas: Theoretical issues: This section addresses key issues such as the nature of the concepts of language maintenance, language loyalty and language identity, language shift, language loss and language death. It includes the search for models of the often contradictory theoretical issues involved in language contact. Language policy and language planning: This section examines the various language policies carried out by official agencies and focuses on the two basic options available to a multilingual nation: assimilation or pluralism. Attitudes towards languages: The section is geared towards research into determinants of language attitudes, the methods for the measurements of attitudes, as well as the relationship between language policy and attitude change. Codeswitching and language choice: The linguistic, social, psychological, and anthropological implications of using two different codes will be examined from different perspectives. Relevant research topics include: the situational uses of code-switching, linguistic and social constraints on codeswitching, and code-switching vs. borrowing. A further research paradigm deals with the search for relativized constraints, resulting from the interaction of universal principles and aspects particular to each codeswitching situation.

Prosodic Categories: Production, Perception and Comprehension Mar 16 2022 Located at the intersection of phonology, psycholinguistics and phonetics, this volume offers the latest research findings in key areas of prosodic theory, including: •The relationship between intonation and pragmatics in speech production •Sentence modality prosody characterization •The role of pitch in quantity-based sound systems •Consonant-conditioned tone depression phonology across languages •The encoding of intonational contrasts in both intonational and tonal languages Featuring new data and ground-breaking results, the papers draw on empirical approaches that analyze production, perception and comprehension experiments such as the prepared speech paradigm and semantic scaling tasks. These are discussed in a variety of languages, some underrepresented in the literature (such as French and Estonian) while others, such as Shekgalagari, are examined in this way for the first time. This collection of cutting-edge material will be of interest to a broad range of language researchers.

Language Acquisition, Processing and Bilingualism May 06 2021 Bringing together selected papers from the conference "The Romance Turn VII" held in Venice in October 2015, this volume focuses on a broad range of topics at the heart of the current debate on language acquisition, including clitic pronouns, left-dislocations, passives, relative clauses, and wh-questions. It explores these topics within a range of different acquisition settings, such as L1 and L2 acquisition, bilingualism, typical and atypical development. In addition to syntax, the volume covers other modules of grammar, namely, semantics, pragmatics, and phonology, and adds a perspective on language processing to current discussions on the acquisition of Romance languages. This book also includes contributions on atypical language acquisition in cases of deafness and on language intervention based on formal linguistics. It will appeal not only to scholars and students interested in the nature and processes behind first, second and bilingual language acquisition, and impaired language acquisition, but also to language educators and clinicians.

Developing Narrative Comprehension Apr 29 2023 Comprehension of texts and understanding of questions is a cornerstone of successful human communication. Whilst reading comprehension has been thoroughly investigated in the last decade, there is surprisingly little research on children's comprehension of picture stories, particularly for bilinguals. This can be partially explained by the lack of cross-culturally robust, cross-linguistic instruments targeting early narration. This book presents an inference-based model of narrative comprehension and a tool that grew out of a large-scale European project on multilingualism. Covering a range of language settings, the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills (bilingual) children can be expected to master at a certain age, and explores how such comprehension is affected (or not affected) by linguistic and extra-linguistic factors. Linking theory to method, the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative, multilingualism, and language acquisition.

Semantics in Acquisition Dec 25 2022 This volume contains writings focusing on semantic phenomena and their interpretation in the analysis of the language of a learner. The variety of phenomena that are addressed is substantial: temporal aspect and tense, specificity, quantification, scope, finiteness, focus structure, and focus particles. These phenomena are investigated in many languages. The volume creates a theoretical as well as an empirical bridge between semantic research on the one hand and psycholinguistic acquisition studies on the other.

Connectionist Psycholinguistics Feb 03 2021 Setting forth the state of the art, leading researchers present a survey on the fast-developing field of Connectionist Psycholinguistics: using connectionist or neural networks, which are inspired by brain architecture, to model empirical data on human language processing. Connectionist psycholinguistics has already had a substantial impact on the study of a wide range of aspects of language processing, ranging from inflectional morphology, to word recognition, to parsing and language production. Christiansen and Chater begin with an extended tutorial overview of Connectionist Psycholinguistics which is followed by the latest research by leading figures in each area of research. The book also focuses on the implications and prospects for connectionist models of language, not just for psycholinguistics, but also for computational and linguistic perspectives on natural language. The interdisciplinary approach will be relevant for, and accessible to psychologists, cognitive scientists, linguists, philosophers, and researchers in artificial intelligence.

Intercomprehension in Germanic Languages Jan 14 2022 Seminar paper from the year 2013 in the subject English Language and Literature Studies - Linguistics, grade: 1,0, University of Potsdam (Institut für Anglistik/ Amerikanistik), course: Transfer in Second Language Acquisition, language: English, abstract: Since communication relies on comprehension, intercomprehension as a learning principle is a way to save time and energy when learning a language. In this respect, (partial) multilingualism or plurilingualism becomes attainable for many more language learners at a time. But in order to reach the goal of multilingualism in the form of partial skills learning, some basic requirements have to be met. (van de Poel in: Kischel 2002: 97) (...) In this paper, I want to prove that L1 speakers of German are able to understand the main information provided by a short text in Dutch - a language, no one of the subjects in the short study I conducted has formally acquired before. The basis of such receptive comprehension of Dutch by L1 speakers of German is laid by the principle of Germanic intercomprehension, whose main characteristics and aspects will be discussed in the first part of the paper. In the second part, the study itself will be presented and analyzed. Is L1 German the only important resource language for reading comprehension in Dutch? Do L1 speakers of German with a high proficiency in L2 English have a higher success rate in this respect than L1 Germans with low-intermediate proficiency in L2 English? What are the possibilities of Germanic intercomprehension? With the help of the study presented, these questions shall be answered in the course of this paper.

Linguistics in the Netherlands 1977-1979 Feb 27 2023

The Prodigal Tongue Oct 23 2022 CHOSEN BY THE ECONOMIST AS A BEST BOOK OF THE YEAR An American linguist teaching in England explores the sibling rivalry between British and American English "English accents are the sexiest." "Americans have ruined the English language." Such claims about the English language are often repeated but rarely examined. Professor Lynne Murphy is on the linguistic front

line. In *The Prodigal Tongue* she explores the fiction and reality of the special relationship between British and American English. By examining the causes and symptoms of American Verbal Inferiority Complex and its flipside, British Verbal Superiority Complex, Murphy unravels the prejudices, stereotypes and insecurities that shape our attitudes to our own language. With great humo(u)r and new insights, Lynne Murphy looks at the social, political and linguistic forces that have driven American and British English in different directions: how Americans got from centre to center, why British accents are growing away from American ones, and what different things we mean when we say estate, frown, or middle class. Is anyone winning this war of the words? Will Yanks and Brits ever really understand each other?

Immigration and Membership Politics in Western Europe Apr 24 2020 Why are traditional nation-states newly defining membership and belonging? In the twenty-first century, several Western European states have attached obligatory civic integration requirements as conditions for citizenship and residence, which include language proficiency, country knowledge and value commitments for immigrants. This book examines this membership policy adoption and adaptation through both medium-N analysis and three paired comparisons to argue that while there is convergence in instruments, there is also significant divergence in policy purpose, design and outcomes. To explain this variation, this book focuses on the continuing, dynamic interaction of institutional path dependency and party politics. Through paired comparisons of Austria and Denmark, Germany and the United Kingdom, and the Netherlands and France, this book illustrates how variations in these factors - as well as a variety of causal processes - produce divergent civic integration policy strategies that, ultimately, preserve and anchor national understandings of membership.

Handbook of Reading Research, Volume V Mar 24 2020 In a time of pressures, challenges, and threats to public education, teacher preparation, and funding for educational research, the fifth volume of the *Handbook of Reading Research* takes a hard look at why we undertake reading research, how school structures, contexts and policies shape students' learning, and, most importantly, how we can realize greater impact from the research conducted. A comprehensive volume, with a "gaps and game changers" frame, this handbook not only synthesizes current reading research literature, but also informs promising directions for research, pushing readers to address problems and challenges in research design or method. Bringing the field authoritatively and comprehensively up-to-date since the publication of the *Handbook of Reading Research, Volume IV*, this volume presents multiple perspectives that will facilitate new research development, tackling topics including: Diverse student populations and sociocultural perspectives on reading development Digital innovation, literacies, and platforms Conceptions of teachers, reading, readers, and texts, and the role of affect, cognition, and social-emotional learning in the reading process New methods for researching reading instruction, with attention to equity, inclusion, and education policies Language development and reading comprehension Instructional practices to promote reading development and comprehension for diverse groups of readers Each volume of this handbook has come to define the field for the period of time it covers, and this volume is no exception, providing a definitive compilation of current reading research. This is a must-have resource for all students, teachers, reading specialists, and researchers focused on and interested in reading and literacy research, and improving both instruction and programs to cultivate strong readers and teachers.

Intercultural and International Business Communications Oct 11 2021 This volume originates from the editors' interest in one of the most relevant fields of research these days: Intercultural and International Business Communication. The needs of the business world to communicate effectively at an international level in order to overcome language differences have proved to be a fascinating topic for many scholars. International business discourse is culturally-situated and therefore context-dependent, and all three - discourse, culture and context - play a key role in the communication process. The present contributions analyse this topic under the perspective of theory, research and teaching. Different scholars have offered their views on the subject, presenting contributions on different areas related to business communication all over the world.

Bilingual Cognition Dec 21 2019 This introductory level textbook comprehensively covers the psycholinguistic study of bilingualism and multilingualism, including traditional and brain-based approaches. Each chapter covers a key series of topics in clear, accessible language, and includes a description of the relevant methodological issues.

Learning Environments May 26 2020 In view of the present attempts to broaden the scope of educational research as far as learning is concerned, there has been increased interest in the functional environment of the learner. Since this environment includes psychological, pedagogical, sociological and even cultural-anthropological variables, the term learning environment is more often used. Traditionally this environment

has consisted of the teacher and students in a situation similar to the real context, for instance in an apprenticeship. Although the apprenticeship form of learning has almost disappeared in Western educational systems, its characteristics can now be designed within intelligent learning environments that have the computation and storage capacity of modern technological innovations. The different perspectives regarding learning environments have been bundled into this book in an overview of Dutch and German research. These perspectives pertain to various system levels (learning activities, class- room and school) and to various disciplinary views (pedagogical, psychological, sociological).

Optimality Theoretic Syntax, Semantics, and Pragmatics Aug 09 2021 This book investigates the morphosyntactic, semantic, and pragmatic properties of language, and the interactions between them, from the perspective of Optimality Theory. It integrates optimization processes into the formal and functional study of grammar, interpreting optimization as the result of conflicting, violable ranked constraints. Unlike previous work on the topic, this book also takes into account the question of directionality of grammar. A model of grammar in which optimization processes interact bidirectionally allows both language generation—the process of selecting the optimal form of a given meaning—and language interpretation—the process of optimal interpretation of a given form—to be taken into account. Chapters in this volume explore the consequences of both symmetric (unidirectional) and asymmetric (bidirectional) versions of Optimality Theory, investigating the syntax-semantics interface, first language acquisition, and sequential bilingual grammars. The volume presents cutting edge research in Optimality-Theoretic syntax and semantics, as well as demonstrating how optimization processes as modelled in this formalism serve as a viable approach for linguists and scholars in related fields.

The Psychology of Science Text Comprehension Sep 29 2020 This volume's goal is to provide readers with up-to-date information on the research and theory of scientific text comprehension. It is widely acknowledged that the comprehension of science and technological artifacts is very difficult for both children and adults. The material is conceptually complex, there is very little background knowledge for most individuals, and the materials are often poorly written. Therefore, it is no surprise that students are turned off from learning science and technology. Given these challenges, it is important to design scientific text in a fashion that fits the cognitive constraints of the learner. The enterprise of textbook design needs to be effectively integrated with research in discourse processing, educational technology, and cognitive science. This book takes a major step in promoting such an integration. This volume: *provides an important integration of research and theory with theoretical, methodological, and educational applications; *includes a number of chapters that cover how science text information affects mental representations and strategies; *introduces important suggestions about how text design and new technologies can be thought of as pedagogical features; and *establishes academic text taxonomies and a consensus of the criteria to organize inferences and other mental mechanisms.

Jejueo Sep 22 2022 Jeju Island, located about 30 miles southwest of the Korean mainland, is famous for its natural beauty, dolhaleubang (“stone grandfather”) statues, haenyeo (“sea women”) divers—and its language, which has only recently been recognized as distinct from Korean. This finding—still considered controversial—undermines the centuries-old belief that Korea has a single language within its borders and opens the door to an entirely new perspective on linguistic diversity in East Asia. *Jejueo: The Language of Korea's Jeju Island* offers both an introduction to the language and the foundation for a wave of new research on its many unique features. Through its comprehensive approach, the book helps establish the importance of Jejueo to the cultural and linguistic heritage of not only Jeju Island, but also the entire Korean peninsula. After a brief introductory chapter on the history of the island and its culture, the authors work their way through the language step by step, examining its sounds, part-of-speech system, and rich inventory of suffixes for both nouns and verbs, to which several chapters are devoted. Carefully written to minimize technical language and supplemented with hundreds of examples, the work is intended to be accessible to scholars working in all fields of Korean studies. *Jejueo* tells the story of a language that has been under wraps for far too long and is now in peril. After centuries of use as the first language of the island, only a few thousand elderly fluent speakers remain, leading UNESCO to classify Jejueo as “critically endangered” in 2010. As the first full-length treatment of Jejueo in English, this book marks a milestone in Korean studies and is sure to trigger extensive discussion of the language and its place in Korean society.
