Archaeology Jul 03 2020 The seventh edition of  
ARCHAEOLOGY reflects the most recent research  
and changes in the field, while making core  
concepts easy to understand through an  
engaging writing style, personalized examples,  
and high-interest topics. This text pairs two  
of archaeology's most recognized names, Robert  
L. Kelly and David Hurst Thomas, who together  
have over 75 years of experience leading  
excavations. Important Notice: Media content  
referenced within the product description or  
the product text may not be available in the  
ebook version.

Database Management Systems Aug 28 2022  
Database Management Systems: Understanding and  
Applying Database Technology focuses on the  
processes, methodologies, techniques, and  
approaches involved in database management  
systems (DBMSs). The book first takes a look

*at ANSI database standards and DBMS applications and components. Discussion focus on application components and DBMS components, implementing the dynamic relationship application, problems and benefits of dynamic relationship DBMSs, nature of a dynamic relationship application, ANSI/NDL, and DBMS standards. The manuscript then ponders on logical database, interrogation, and physical database. Topics include choosing the right interrogation language, procedure-oriented language, system control capabilities, DBMSs and language orientation, logical database components, and data definition language. The publication examines system control, including system control components, audit trails, reorganization, concurrent operations, multiple database processing, security and privacy, system control static and dynamic differences, and installation and maintenance. The text is a valuable source of information for computer engineers and researchers interested in exploring the applications of database technology.*

*Brittany in the Early Middle Ages Feb 07 2021*  
*This volume focuses on Wendy Davies's work on early medieval Breton texts and their implications. Beginning with core analyses of the Redon and Landévennec cartularies, it*

continues with papers that tease out some of the key social implications of the 9th-century Redon material - on the nature of political power, on rural communities, on the settlement of disputes, and on transmission of property. While the Redon charters have long been known as a source of fundamental importance for Breton history, the author's database (established in the 1980s) allowed much greater understanding of the role of individuals - at all social levels, and particularly peasant level - than had previously been possible. Attention to the detail of the east Breton past also includes papers on some of the results of her fieldwork, on building stone in particular. Early medieval Brittany is not merely interesting in itself (and it is certainly not some Celtic backwater): Breton evidence can usefully be differentiated from the evidence of other Celtic areas and has a significant role in wider issues of European history. As well as papers on the familiar themes of kingship, rulership, cult sites and cemeteries, the final section highlights the distinctive quality of the Breton evidence for the protection of sacred and personal space, for slavery and serfdom and for village-level courts.

*Hunter-Gatherers of Early Holocene Coastal California Jul 15 2021 This volume is the first to bring together a number of studies on the Early Holocene of the California coast (ca. 10,000 to 6600 BP). Erlandson and Colten have assembled contributions that may be of interest to a broad spectrum of scholars whose research pertains to any of the following: early sites in the Americas, coastal adaptations, hunter-gatherer adaptations, general Pacific coast prehistory, and the specific history of research on pre-6600 BP occupations of coastal California.*

*Social Movements and Cultural Change Mar 30 2020 In the half decade between 1787 and 1792, thanks to the work of the Abolition Committee in Britain, a vast change occurred in the way slavery and the slave trade were defined.*

Previously seen as necessary evils, they were seen after 1792 as gross injustices and evils that had to disappear. The present volume uses the abolition movement to show how social movements produce and change meanings and thus bring about cultural change. D'Anjou's analytical strategy has two aspects. It distinguishes the social movement as whole from its component elements, and separates its organizational context from other historical developments, the historical context. In adopting this strategy, collective campaigns are studied as instances of contentious actions that depend on antecedent developments and of characteristics that are central in explaining the effect of those actions on the culture of a society. Devising a tentative model from existing empirical research on social movements, the author tests that model against the results of his case study. The resulting conceptual model, as refined, may be used as an instrument in further research on movements and the construction of meaning. This evolved model is built around three notions: history, agency, and the collective campaign resulting in a public discourse. When, as happened in abolition, the views of the actors prevail in the public discourse, cultural change occurs.

*Ensuring the Integrity of Electronic Health Records* Jan 27 2020 Data integrity is a critical aspect to the design, implementation, and usage of any system which stores, processes, or retrieves data. The overall intent of any data integrity technique is the same: ensure data is recorded exactly as intended and, upon later retrieval, ensure the data is the same as it was when originally recorded. Any alternation to the data is then traced to the person who made the modification. The integrity of data in a patient's electronic health record is critical to ensuring the safety of the patient. This book is relevant to production systems and quality control systems associated with the manufacture of pharmaceuticals and medical device products and updates the practical information to enable better understanding of the controls applicable to e-records. The book highlights the e-records suitability implementation and associated risk-assessed controls, and e-records handling. The book also provides updated regulatory standards from global regulatory organizations such as MHRA, Medicines and Healthcare Products Regulatory Agency (UK); FDA, Food and Drug

Administration (US); National Medical Products Association (China); TGA, Therapeutic Goods Administration (Australia); SIMGP, Russia State Institute of Medicines and Good Practices; and the World Health Organization, to name a few.

Return of the Canoe Societies Jun 01 2020  
Return Of The Canoe Societies tells the story of a group of First Nations paddlers who are on a replication of the Qatuwas voyage by the Canoe Societies in 1993, to demonstrate

solidarity for the many remaining land claims under negotiation by the B. C. Treaty Commission. As they attempt to paddle to Bella Bella up the rugged coast of B. C., the paddlers come under physical attack by unknown opponent(s) of the Treaty settlements. First, death threats against the paddlers are received by the Voyage of Solidarity Committee. Then the Dugout Coordinator, a Heiltsuk man named Nate Archer, mysteriously disappears after being pulled from the water following a overturning of the canoe. He vanishes in a mysterious fishboat that picks him up as he tries to swim to shore to get help for the others. Next, the owner of an old white and grey fishboat attempts to plough through the dugouts as they go in to a stopover point in Chemainus. Nate Archers body is dumped from the fishboat as it leaves. He has been shot in the head. The canoeists change their route to try and evade further attacks but are challenged by further ambushes as they struggle up the B.C. coast. Relevent history is related in the novel by a series of time-travel flashbacks that take the main characters, Rachel McBay, a Heiltsuk young woman who is a graduate Psychology student, her grandmother, Rachel McBay, the Heiltsuk ceremonial chanter, Paul Archer, an activist lawyer, who has replaced Nate Archer, and

*Nigel Kent, the eccentric English, film documentor hired to record the voyage, on a tour of First Nations history since the arrival of the first English settlers to B. C. They participate in the Potlatch on Village Island in 1921, the sentencing of the forty-five Kwakiutl people to prison in 1922, and their experiences there. Other historical flasbacks include a visit to the residential school system, the Nishgaa chiefs being rebuffed by Premier Smithe in 1887, the McKenna-McBride Royal Commission on Indian Affairs, Deputy Superintendent Duncan Scotts plans for Assimilation, the Nishgaa land claim strategy in 1954, and scenes of the resurgence of the culture in Alert Bay in 1965 and the logging blockage on Meares Island.*

*The Sedimentary Record of Sea-Level Change Apr 04 2023 This unique textbook describes how past changes in sea-level can be detected through an analysis of the sedimentary record. In particular, it concentrates on the current sequence stratigraphy model. It explains this model from basics and shows how the model can be applied to both siliciclastic and carbonate successions. Designed for undergraduate and graduate courses in sequence stratigraphy, as well as for professional courses within the petroleum industry, this full-colour textbook*

includes numerous features that will aid tutors and students alike. These include detailed case studies demonstrating the practical applications of sequence stratigraphy and set-aside boxes providing supplementary and background information. Bulleted questions and answers are interspersed throughout the text, encouraging students to test their understanding of the material. The book is supported by a website hosting sample pages from the book, selected illustrations to download, and worked exercises.

Implementing Online Union Lists of Serials

Nov 18 2021 This book, first published in 1989, is a comprehensive look at PaULS, the Pennsylvania Union List of Serials. The editors, both of whom have extensive experience with online union listing, have collected the previously published articles recording the development and implementation of PaULS; compiled new articles representing updated perspectives; provided the PaULS procedure manual; and included an annotated bibliography of literature about online union listing. Contributors to this fascinating volume describe extensive union listing activities of West Virginia University, a special library, Calgon Corporation, and a

*FileMaker Pro 13: The Missing Manual Jul 27 2022 You don't need a technical background to build powerful databases with FileMaker Pro 13. This crystal-clear guide covers all new FileMaker Pro 13 features, such as its improved layout tools and enhanced mobile support. Whether you're running a business, printing a catalog, or planning a wedding, you'll learn how to customize your database to run on a PC, Mac, Web browser, or iOS device. The important stuff you need to know: Get started. Tour FileMaker Pro's features and create your first database in minutes. Access data anywhere. Use FileMaker Go on your iPad or iPhone—or share data on the Web. Dive into relational data. Solve problems quickly by connecting and combining data tables. Create professional documents. Publish reports, invoices, catalogs, and other documents with ease. Harness processing power. Use calculations and scripts to crunch numbers, search text, and automate tasks. Add visual power and clarity. Create colorful charts to illustrate and summarize your data. Share your database on a secure server. Add the high-*

level features of FileMaker Pro Advanced and FileMaker Pro Server.

*Big Data Mining for Climate Change Aug 04 2020*  
*Big Data Mining for Climate Change* addresses how to manage the vast amount of information available for analysis. Climate change and its environmental, economic and social consequences are widely recognized as the biggest, most interconnected problem facing humanity. There is a huge amount of potential information currently available...and it is growing exponentially. This book walks through the latest research and how to navigate the resources available using big data applications. It is appropriate for scientists and advanced students studying climate change from a number of disciplines, including the atmospheric sciences, oceanic sciences, geography, environment sciences, ecology, energy, economics, engineering and public policy. Provides a step-by-step guide for applying big data mining tools to climate and environmental research Presents a comprehensive review of theory and algorithms of big data mining for climate change Includes current research in climate and environmental science as it relates to using big data algorithms
