Ryan Stimson outlines a modern approach to playing fluid, creative hockey based on sound analytical research. He shows you, the coach, how to build a tactical framework from the ground up and illustrates how each aspect of the system links with each other. Part 1 details the overall philosophy behind team play, roster construction, and tactical decisions. "Should we play fast or slow? Which players should play together?" Part 2 takes a modern approach to hockey tactics, using years of quantitative research by Stimson and others determined to find more efficient and optimal ways of playing the game. You won't find a rigid system here, but a set of beliefs and ideology put on the ice that incorporates the highest levels of creativity, fluidity, and support. Finally in part Part 3, a narration of Stimson's coaching experience as he attempts to bring this style of play to life at the 14U level. What works? What doesn't? How does this new approach work when clashing with an old-school coach? Stimson reevaluates everything from names of positions to optimal routes in transition play. This book will appeal to any coach wanting to learn more about analytics, and to any analyst wanting to learn more about tactics. Stimson meets you in the middle and illustrates what can come out of union of the two: Total Hockey. Stick one into a deck, press play, and you're instantly transported to another time in your life. For Rob Sheffield, that time was one of miraculous love and unbearable grief. A time that spanned seven years, it started when he met the girl of his dreams, and ended when he watched her die in his arms. Using the listings of fifteen of his favorite

mix tapes, Rob shows that the power of music to build a bridge between people is stronger than death. You'll read these words, perhaps surprisingly, with joy in your heart and a song in your head—the one that comes to mind when you think of the love of your life. Love is a mix tape.”—Rolling Stone “Many of us use pop culture as a mirror of our emotional lives, but Sheffield happily walks right through the looking glass.”—Los Angeles Times “Sheffield writes with such aching remembering, you feel like you are invading his privacy . . . and it’s the truth of those details that make this memoir so touching.”—Newsweek

Kinesiology taping on human athletes is all the rage: widely used by physical therapists, chiropractors, and personal trainers, we see it on Olympians, runners, basketball players—on amateurs and professionals. The idea behind taping is that it provides incredible support and stabilization of ligaments and tendons while simultaneously stretching and flexing like a "second skin" to allow full range of motion. It can also activate or relax muscles, depending on its application. Our equine athletes can benefit hugely from taping techniques, and this terrific guidebook provides the ultimate reference for understanding both the uses of kinesiology tape and its numerous applications. With hundreds of color photographs and step-by-step instructions for the do-it-yourselfer, equine physiotherapist Katja Bredlau-Morich explains the following forms of kinesiology taping: Muscle - Lymphatic - Scar - Fascia - Space - Hematoma - Stabilization - Tendon - Cross In addition, numerous case studies demonstrate how taping can change your horse's life, keeping him pain-free and performing his best for years to come.
