Keeping the Wild Apr 25 2020 Is it time to embrace the so-called “Anthropocene”—the age of human dominion—and to abandon tried-and-true conservation tools such as parks and wilderness areas? Is the future of Earth to be fully domesticated, an engineered global garden managed by technocrats to serve humanity? The schism between advocates of rewilding and those who accept and even celebrate a “post-wild” world is arguably the hottest intellectual battle in contemporary conservation. In *Keeping the Wild*, a group of prominent scientists, writers, and conservation activists responds to the Anthropocene-boosters who claim that wild nature is no more (or in any case not much worth caring about), that human-caused extinction is acceptable, and that “novel ecosystems” are an adequate replacement for natural landscapes. With rhetorical fists swinging, the book’s contributors argue that these “new environmentalists” embody the hubris of the managerial mindset and offer a conservation strategy that will fail to protect life in all its buzzing, blossoming diversity. With essays from Eileen Crist, David Ehrenfeld, Dave Foreman, Lisi Krall, Harvey Locke, Curt Meine, Kathleen Dean Moore, Michael Soulé, Terry Tempest Williams and other leading thinkers, *Keeping the Wild* provides an introduction to this important debate, a critique of the Anthropocene boosters’ attack on traditional conservation, and unapologetic advocacy for wild nature.

Into the Wild Feb 28 2023 Krakauer’s page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. “Terrifying... Eloquent... A heart-rending drama of human yearning.” —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of Into the Wild. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless’s short life. Admitting an interst that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless’s innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless’s uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer’s stoytelling blaze through every page.

Where the Wild Books Are Dec 14 2021 As interest in environmental issues grows, many writers of fiction have embraced themes that explore the connections between humans and the natural world. Ecologically themed fiction ranges from profound philosophical meditations to action-packed entertainments. *Where the Wild Books Are* offers an overview of nearly 2,000 works of nature-oriented fiction. The author includes a discussion of the precursors and history of the genre, and of its expansion since the 1970s. He also considers its forms and themes, as well as the subgenres into which it has evolved, such as speculative fiction, ecodefense, animal stories, mysteries, ecofeminist novels, cautionary tales, and others. A brief summary and critical commentary of each title is included. Dwyer’s scope is broad and covers fiction by Native American writers as well as ecofiction from writers around the world. Far more than a mere listing of books, *Where the Wild Books Are* is a lively introduction to a vast universe of engaging, provocative writing. It can be used to develop book collections or curricula. It also serves as an introduction to one of the most fertile areas of contemporary fiction, presenting books that will offer enjoyable reading and new insights into the vexing environmental questions of our time.

In the Eye of the Wild Oct 24 2022 After enduring a vicious bear attack in the Russian Far East’s Kamchatka Peninsula, a French anthropologist undergoes a physical and spiritual transformation that forces her to confront the tenuous distinction between animal and human. In *the Eye of the Wild* begins with an account of the French anthropologist Nastassja Martin’s near fatal run-in with a Kamchatka bear in the mountains of Siberia. Martin’s professional interest is animism; she addresses philosophical questions about the relation of humankind to nature, and in her work she seeks to partake as fully as she can in the lives of the indigenous peoples she studies. Her violent encounter with the bear, however, brings her face-to-face with something entirely beyond her ken—the untamed, the nonhuman, the animal, the wild. In the course of that encounter something in the balance of her world shifts. A change takes place that she must somehow reckon with. Left severely mutilated, dazed with pain, Martin undergoes multiple operations in a provincial Russian hospital, while also being grilled by the secret police. Back in France, she finds herself back on the operating table, a source of new trauma. She realizes that the only thing for her to do is to return to Kamchatka. She must discover what it means to have become, as the Even people call it, medka, a person who is half human, half bear. In *the Eye of the Wild* is a fascinating, mind-altering book about terror, pain, endurance, and self-transformation, comparable in its intensity of perception and originality of style to J. A. Baker’s classic *The Peregrine*. Here Nastassja Martin takes us to the farthest limits of human being.

Warrior of the Wild Mar 17 2022 An eighteen-year-old chieftain’s daughter must find a way to kill her village’s oppressive deity if she ever wants to return home in *Warrior of the Wild*, the Viking-inspired YA standalone fantasy from Tricia Levenseller, author of *Daughter of the Pirate King*. How do you kill a god? As her father’s chosen heir, eighteen-year-old Rasmira has trained her whole life to become a warrior and lead her village. But when her coming-of-age trial is sabotaged and she fails the test, her father banishes her to the monster-filled wilderness with an impossible quest: To win back her honor, she must kill the oppressive god who claims tribute from the villages each year or die trying.

Song of the Wild: A First Book of Animals Feb 04 2021 Renowned picture book creators Nicola Davies and Petr Horáček team up for a captivating first look at animals around the world. Polar bears playing on the ice, tigers hunting in the jungle, and nightingales singing in the heart of the woods — animals are everywhere. In a remarkable collection of poems, children’s author Nicola Davies shares keen observations on wildlife around the world. Sometimes lyrical and sometimes humorous, the poems reveal fascinating facts about animals of every color, shape, size, and origin, from giant blue whales to bats as tiny as bumblebees. Lively, colorful illustrations by Petr Horáček reveal the vast beauty and variety of the animal world in this essential introduction, perfect for even the youngest amateur zoologists.

For the Wild Jan 27 2023 For the Wild explores the ways in which the commitments of radical environmental and animal-rights activists develop through powerful experiences with the more-than-human world during childhood and young adulthood. The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection. Emotions and memories of wonder, love, compassion, anger, and grief shape activists’ protest practices and help us understand their deep-rooted dedicaztion to the planet and its creatures. Drawing on analyses of activist art, music, and writings, as well as interviews and participant-observation in activist communities, Sarah M. Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity.

The Wild Places Feb 22 2020 From the author of *The Old Ways* and *Underland*, an “eloquent (and compulsively readable) reminder that, though we’re laying waste the world, nature still holds sway over much of the earth’s surface.” --Bill McKibben Winner of the Boardman Tasker Prize for Mountain Literature and a finalist for the Orion Book Award Are there any genuinely wild places left in Britain and Ireland? That is the question that Robert Macfarlane poses to himself as he embarks on a series of breathtaking journeys through some of the archipelago’s most remarkable landscapes. He climbs, walks, and swims by day and spends his nights sleeping on cliff-tops and in ancient meadows and wildwoods. With elegance and passion he entwines history, memory, and landscape in a bewitching evocation of wildness and its vital importance.

Church of the Wild Jul 21 2022 Once upon a time, humans lived in intimate relationship with nature. Whether disillusioned by the dominant church or unfulfilled by traditional expressions of faith, many of us long for a deeper spirituality. Victoria Looorz certainly did. Coping with an unraveling vocation, identity, and planet, Looorz turned to the wanderings of spiritual leaders and the sanctuary of the natural world, eventually cofounding the Wild Church Network and Seminary of the Wild. With an ecospiritual lens on biblical narratives and a fresh look at a community larger than our own species, *Church of the Wild* uncovers the wild roots of faith and helps us deepen our commitment to a suffering earth by falling in love with it—and calling it church. Through mystical encounters with wild deer, whispers from a scrubby oak tree, wordless conversation with a cougar, and more, Looorz helps us connect to a love that literally holds the world together—a love that calls us into communion with all creatures.

Rules of the Wild Oct 12 2021 Playing in the dirt, staying up all night, and leaving clothes strewn across the floor are not a problem if you’re a wild animal. Dunking food, burping, and splashing—no problem either. Human kids, who are expected to follow rules, rules, rules, will squeal with delight as the pages reveal wild animals getting away with all kinds of outlandish behavior and will relish “knowing better!”

The Rediscovery of the Wild Apr 06 2021 A compelling case for connecting with the wild, for our psychological and physical well-being and to flourish as a species We often enjoy the benefits of connecting with nearby, domesticated nature—a city park, a backyard garden. But this book makes the provocative case for the necessity of connecting with wild nature—untamed, unmanaged, not encompassed, self-organizing, and unencumbered and unmediated by technological artifice. We can love the wild. We can fear it. We are strengthened and nurtured by it. As a species, we came of age in a natural world far wilder than today’s, and much of the need for wildness still exists within us, body and mind. The Rediscovery of the Wild considers ways to engage with the wild, protect it, and recover it—for our psychological and physical well-being and to flourish as a species. The contributors offer a range of perspectives on the wild, discussing such topics as the evolutionary underpinnings of our need for the wild; the wild within, including the primal passions of sexuality and aggression; birding as a portal to wildness; children’s fascination with wild animals; wildness and psychological healing; the shifting baseline of what we consider wild; and the true work of conservation.

Hockey in the Wild Jun 27 2020 The lovable trio hits the ice . . . eventually! It's wintertime, and the bear, the moose and the beaver can't wait for hockey season to start. They're so eager, in fact, they head out onto the ice before it's thick enough, and they all fall through. Twice. While they wait for the lake to freeze, they try to take their minds off hockey. There's competitive napping. Karaoke. Lots of comfort food. Until, at last, the day arrives when the ice is ready. But, after all that time not being active, are they ready? The waiting is the hardest part, right?

The Call of the Wild Mar 05 2021 Retells in graphic novel format London's story about an unusual dog, part Saint Bernard and part Scotch shepherd, who is forcibly taken to the Klondike gold fields where he eventually becomes the leader of a wolf pack.

Of the Wild Apr 30 2023 Aeris, a shapeshifter of the Wild, steals children from unloving homes and raises them as his own in an enchanted grove deep in the Woods. Under the protective eye of their new guardian, the children absorb the forest's magic and grow more fey-like than human: some of them sprout mushrooms or flowers while others develop scales or wings. But the reserve of magic that keeps Aeris and his forest home alive is inexplicably running dry. With his life waning and the dangers of the Wild creeping closer and closer, Aeris will do anything to protect his family, even set his hopes on an unlikely new arrival in the Woods: a human stranger.

The End of the Wild Jan 03 2021 A wake-up call that argues that although it may be too late to save biodiversity, we can take steps to save our ecosystems. With the extinction rate at 3000 species a year and accelerating, we can now predict that as many as half of the Earth's species will disappear within the next 100 years. The species that survive will be the ones that are most compatible with us: the weedy species--from mosquitoes--to coyotes--that thrive in continually disturbed human-dominated environments. The End of the Wild is a wake-up call. Marshaling evidence from the last ten years of research on the environment, Stephen Meyer argues that nothing--not national or international laws, global bioreserves, local sustainability schemes, or "wildlands"--will change the course that has been set. Like it or not, we can no longer talk about conserving nature, only managing what is left. The race to save biodiversity is over. But that doesn't mean our work is over. The End of the Wild is also a call to action. Without intervention, the surviving ecosystems we depend on for a range of services--including water purification and flood and storm damage contro--could fail and the global spread of invasive species (pests, parasites, and disease-causing weedy species) could explode. If humanity is to survive, Meyer argues, we have no choice but to try to manage the fine details. We must move away from the current haphazard strategy of protecting species in isolation and create trans-regional "meta-reserves," designed to protect ecosystem functions rather than species-specific habitats.

Children of the Wild West Sep 11 2021 This is a portrait of pioneer and American Indian children in the 19th-century West. It covers both the lives of settlers, crossing America in covered wagons and building log or sod cabins, and of the American Indians whose lives were changed by the new arrivals.

Home of the Wild Mar 25 2020 A gorgeously poetic story about connection and the natural world with rich illustrations and a gentle meditation on learning to let go.

The End of the Wild Jan 15 2022 This timely coming of age novel takes on the controversial issues of fracking and environmental protection. Stay away from my woods. Eleven-year-old Fern doesn't have the easiest life. Her stepfather is out of work, and she's responsible for putting dinner on the table--not to mention keeping her wild younger brothers out of trouble. The woods near their home is her only refuge, where she finds food and plays with her neighbor's dog. But when a fracking company rolls into town, her special grove could be ripped away, and no one else seems to care. Her stepfather needs the money that a job with the frackers could bring to their family, and her wealthy grandfather likes the business it brings to their town. Even her best friend doesn't understand what the land means to Fern. With no one on her side, how can she save the forest that has protected her for so long? The acclaimed author of *Wonder at the Edge of the World* weaves a poignant story about life on the poverty line, the environment, friendship and family--and, most of all, finding your place in the world.

State of the Wild Sep 23 2022 In wild places where nature thrives, humanity prospers; our well-being is inextricably linked with that of the planet's web of life. In fact, one could argue that the state of the world can be measured by the state of the wild. But how do we gauge the state of earth's wildlife, wildlands, and oceans? State of the Wild is a new series that brings together some of the world's most renowned conservationists and writers--George Schaller, Alan Rabinowitz, Sylvia Earle, Rick Bass, Bill McKibben, Tom Lovejoy, and many others--to assess wildlife and wilderness, and to provide insights into how humans can become better stewards of the wild. This new series combines evocative writings with a fascinating tour of news highlights and vital statistics from around the world. One-third of each volume will focus on a topic of particular concern to conservationists working to protect wildlife and our last wild places. This 2006 edition explores the impacts of hunting and the wildlife trade through a range of essays: Ted Kerasote traces the history of hunting in North America; Carl Safina, Eric Gilman, and Wallace J. Nichols quantify the toll taken by commercial fishing on seabirds, turtles, and other marine species; James Compton and Samuel K. H. Lee explore the global reach of the wildlife trade for traditional Asian medicine. Contributors also examine other pivotal conservation issues, from the reasons why one in eight of the world's birds are endangered, to the impacts of global climate change, to the complexity of conserving seals, flamingos, zebras, and other wide-ranging species. The book's closing essay, "The Relative Wild," considers what exactly it means for a place to be "wild," where even the most remote corners of the planet have been altered by human activities. Uniquely structured with magazine-like features up front, conservation news in the middle, and essay contributions from eminent authors and biologists throughout, this landmark series is an essential addition to any environmental bookshelf.

Wild Apr 18 2022 #1 NEW YORK TIMES BESTSELLER • A powerful, blazingly honest memoir: the story of an eleven-hundred-mile solo hike that broke down a young woman reeling from catastrophe—and built her back up again. At twenty-two, Cheryl Strayed thought she had lost everything. In the wake of her mother’s death, her family scattered and her own marriage was soon destroyed. Four years later, with nothing more to lose, she made the most impulsive decision of her life. With no experience or training, driven only by blind will, she would hike more than a thousand miles of the Pacific Crest Trail from the Mojave Desert through California and Oregon to Washington State—and she would do it alone. Told with suspense and style, sparkling with warmth and humor, *Wild* powerfully captures the terrors and pleasures of one young woman forging ahead against all odds on a journey that maddened, strengthened, and ultimately healed her.

The Wild Book Mar 29 2023 “We walked toward the part of the library where the air smelled as if it had been interred for years. . . . Finally, we got to the hallway where the wooden floor was the creakiest, and we sensed a strange whiff of excitement and fear. It smelled like a creature from a bygone time. It smelled like a dragon.” Thirteen-year-old Juan’s favorite things in the world are koalas, eating roast chicken, and the summer-time. This summer, though, is off to a terrible start. First, Juan’s parents separate and his dad goes to Paris. Then, as if that wasn’t horrible enough, Juan is sent away to his strange Uncle Tito’s house for the entire break! Uncle Tito is really odd: he has zigzag eyebrows; drinks ten cups of smoky tea a day; and lives inside a huge, mysterious library. One day, while Juan is exploring the library, he notices something inexplicable and rushes to tell Uncle Tito. “The books moved!” His uncle drinks all his tea in one gulp and, sputtering, lets his nephew in on a secret: Juan is a *Princeps Reader*—which means books respond magically to him—and he’s the only person capable of finding the elusive, never-before-read *Wild Book*. Juan teams up with his new friend Catalina and his little sister, and together they delve through books that scuttle from one shelf to the next, topple over unexpectedly, or even disappear altogether to find *The Wild Book* and discover its secret. But will they find it before the wicked, story-stealing *Pirate Book* does?

Cognition in the Wild Nov 01 2020 Edwin Hutchins combines his background as an anthropologist and an open ocean racing sailor and navigator in this account of how anthropological methods can be combined with cognitive theory to produce a new reading of cognitive science. His theoretical insights are grounded in an extended analysis of ship navigation—its computational basis, its historical roots, its social organization, and the details of its implementation in actual practice aboard large ships. The result is an unusual interdisciplinary approach to cognition in culturally constituted activities outside the laboratory—“in the wild.” Hutchins examines a set of phenomena that have fallen in the cracks between the established disciplines of psychology and anthropology, bringing to light a new set of relationships between culture and cognition. The standard view is that culture affects the cognition of individuals. Hutchins argues instead that cultural activity systems have cognitive properties of their own that are different from the cognitive properties of the individuals who participate in them. Each action for bringing a large naval vessel into port, for example, is informed by culture: the navigation team can be seen as a cognitive and computational system. Introducing Navy life and work on the bridge, Hutchins makes a clear distinction between the cognitive properties of an individual and the cognitive properties of a system. In striking contrast to the usual laboratory tasks of research in cognitive science, he applies the principal metaphor of cognitive science—cognition as computation (adopting David Marr’s paradigm)—to the navigation task. After comparing modern Western navigation with the method practiced in Micronesia, Hutchins explores the computational and cognitive properties of systems that are larger than an individual. He then turns to an analysis of learning or change in the organization of cognitive systems at several scales. Hutchins’s conclusion illustrates the costs of ignoring the cultural nature of cognition, pointing to the ways in which contemporary cognitive science can be transformed by new meanings and interpretations. These explorers are prepared for anything . . . except each other! When Bear and Boy meet in the woods, they're scared at first. Really scared. But soon these kings of the wild realize that no mountain is too big to conquer if you have a friend to climb it by your side. Praise for Explorers of the Wild "[An] exquisite book . . . [with] ravishing art." -- USA Today Praise for To the Sea "A whale's tale that dives deep and surfaces with useful lessons about making, keeping, and helping friends." -- Kirkus Reviews "An unusual and appealing story about friendship." -- School Library Journal

The Fall of the Wild Sep 30 2020 The passenger pigeon, the great auk, the Tasmanian tiger—the memory of these vanished species haunts the fight against extinction. Seeking to save other creatures from their fate in an age of accelerating biodiversity loss, wildlife advocates have become captivated by a narrative of heroic conservation efforts. A range of technological and policy strategies, from the traditional, such as regulations and refuges, to the novel—the scientific wizardry of genetic engineering and synthetic biology—seemingly promise solutions to the extinction crisis. In *The Fall of the Wild*, Ben A. Minteer calls for reflection on the ethical dilemmas of species loss and recovery in an increasingly human-driven world. He asks an unsettling but necessary question: Might our well-meaning efforts to save and restore wildlife pose a threat to the ideal of preserving a world that isn't completely under the human thumb? Minteer probes the tension between our impulse to do whatever it takes and the risk of pursuing strategies that undermine our broader commitment to the preservation of wildness. From collecting wildlife specimens for museums and the wilderness aspirations of zoos to visions of “assisted colonization” of new habitats and high-tech attempts to revive long-extinct species, he explores the scientific and ethical concerns vexing conservation today. *The Fall of the Wild* is a nuanced treatment of the deeper moral issues underpinning the quest to save species on the brink of extinction and an accessible intervention in debates over the principles and practice of nature conservation.

The Practice of the Wild Dec 02 2020 "This is an important book for anyone interested in the ethical interrelationships of things, places, and people, and it is a book that is not just read but taken in." —Library Journal Featuring a new introduction by Robert Hass, the nine captivatingly meditative essays in *The Practice of the Wild* display the deep understanding and wide erudition of Gary Snyder in the ways of Buddhist belief, wildness, wildlife, and the world. These essays, first published in 1990, stand as the mature centerpiece of Snyder's work and thought, and this profound collection is widely accepted as one of the central texts on wilderness and the interaction of nature and culture.
