Modern history has not been neutral in telling the story of religion. Since it presumes the centrality of human motives and machinations as the one and only means of explicating the unfolding of 'events', it has helped set the terms for what counts as a viable motive and what does not, and this is evident in the systematic unmasking of religion as only really ever about 'something else'. By distilling more substantive/primary economic, political or other kinds of motives from the detritus of 'religion', the latter is thus consigned to the past as the primitive husk of more substantive and rational ways of thinking and acting. As a set of historical case studies, the essays collected here forgo that tendency, and suggest different possibilities for conceptualizing the fate of religion in the modern world. They chart a different course, one of faith and self-assertion. The essays take up a variety of episodes from modern European and American history and explore, from various angles, three interrelated themes: 'public religion', and the role of Catholicism as a determined critic of modernity; religion as an impetus for innovation; and the tendency to reduce religion to culture. "Understanding race and ethnic relations is essential to understanding the United States -- where we've been as well as where we're going. Throughout the fourteenth edition of *Racial and Ethnic Groups*, author Richard T. Schaefer helps students view race and ethnic relations in a socio-historical context, so they can understand the past and best shape the future. The text's student-friendly framework is packed with engaging first-person accounts that illuminate the changing dynamics of the U.S. population, and reveal the stories behind these changes. Incorporating the latest statistics and data, *Racial and Ethnic Groups* enables educators to stay current in this ever-changing area of study"--The publisher. Author Richard A. Schaefer is a lifelong communicator, fascinated by stories and, like any good journalist, digs for the facts and verifies sources, exploring nagging questions such as "Is creation or evolution more credible, based on science and expert opinions?" This book truly represents a personal passion of looking at all sides of the CREATION vs. EVOLUTION issue. He has called on many experts and theorists--including Charles Darwin himself. Surprisingly, Darwin was far more skeptical of his own theories than are many PhDs today, and admitted to significant holes in his logic. Read for yourself, as great thinkers explore the pros and cons of both theories and their variants. Here, for the first time in English, is Franz Brentano's *The Teaching of Jesus*, a compendium of texts Brentano assembled for publication shortly before his death that constitute a frank, public settling of accounts with the Christian religion. Originally conceived by Brentano as a volume that might help others similarly led to doubt the doctrines of Christianity, the book is remarkably free of bitterness or spitefulness. On the contrary, what makes the book of singular importance, especially now, is its careful attempt at taking stock of the positive and negative influence Christianity has had in history. This text appeals to those researchers and scholars interested in the work of Franz Brentano and his work on the philosophy of religion, in this case, Christianity. In this 13th edition, Rick Schaefer provides a comprehensive, up-to-date introduction to sociology that appeals to students with a diversity of learning styles. The text focuses on sociology in the global community and encourages students to think about the world they're living in using a sociological imagination.
