Demonstrates how Venetian newsmongers played a crucial yet heretofore unrecognized role in the invention of America. Publisher description As a mythical creature, the whale has been responsible for many transformations in the world. It is an enchanting being that humans have long felt a connection to. In the contemporary environmental imagination, whales are charismatic megafauna feeding our environmentalism and aspirations for a better and more sustainable future. Using multispecies ethnography, Whale Snow explores how everyday the relatedness of the Iñupiat of Arctic Alaska and the bowhead whale forms and transforms "the human" through their encounters with modernity. Whale Snow shows how the people live in the world that intersects with other beings, how these connections came into being, and, most importantly, how such intimate and intense relations help humans survive the social challenges incurred by climate change. In this time of ecological transition, exploring multispecies relatedness is crucial as it keeps social capacities to adapt relational, elastic, and resilient. In the Arctic, climate, culture, and human resilience are connected through bowhead whaling. In Whale Snow we see how climate change disrupts this ancient practice and, in the process, affects a vital expression of Indigenous sovereignty. Ultimately, though, this book offers a story of hope grounded in multispecies

resilience. In 1897, as a white oligarchy made plans to allow the United States to annex Hawai'i, native Hawaiians organized a massive petition drive to protest. Ninety-five percent of the native population signed the petition, causing the annexation treaty to fail in the U.S. Senate. This event was unknown to many contemporary Hawaiians until Noenoe K. Silva rediscovered the petition in the process of researching this book. With few exceptions, histories of Hawai'i have been based exclusively on English-language sources. They have not taken into account the thousands of pages of newspapers, books, and letters written in the mother tongue of native Hawaiians. By rigorously analyzing many of these documents, Silva fills a crucial gap in the historical record. In so doing, she refutes the long-held idea that native Hawaiians passively accepted the erosion of their culture and loss of their nation, showing that they actively resisted political, economic, linguistic, and cultural domination. Drawing on Hawaiian-language texts, primarily newspapers produced in the nineteenth century and early twentieth, Silva demonstrates that print media was central to social communication, political organizing, and the perpetuation of Hawaiian language and culture. A powerful critique of colonial historiography, *Aloha Betrayed* provides a much-needed history of native Hawaiian resistance to American imperialism. The Academic Encounters Second edition series uses a sustained content approach to teach skills necessary for taking academic courses in English. There are two books for each content area. Twenty-three essays by academics consider the historical, cultural, religious and political circumstances of various Native American peoples. Margaret Lock explicitly compares Japanese and North American medical and political accounts of female middle age to challenge Western assumptions about menopause. She uses ethnography, interviews, statistics, historical and popular culture materials, and medical publications to produce a richly detailed account of Japanese women's lives. The result offers irrefutable evidence that the experience and meanings—even the endocrinological changes—associated with female midlife are far from universal. Rather, Lock argues, they are the product of an ongoing dialectic between culture and local biologies. Japanese focus on middle-aged women as family members, and particularly as caretakers of elderly relatives. They attach relatively little importance to the end of menstruation, seeing it as a natural part of the aging process and not a diseaselike state heralding physical decline and emotional instability. Even the symptoms of midlife are different: Japanese women report few hot flashes, for example, but complain frequently of stiff shoulders. Articulate, passionate, and carefully documented, Lock's study systematically undoes the many preconceptions about aging women in two distinct cultural settings. Because it is rooted in the everyday lives of Japanese women, it also provides an excellent entree to Japanese society as a whole. Aging and menopause are subjects that have been closeted behind our myths, fears, and misconceptions. Margaret Lock's cross-cultural perspective gives us a critical new lens through which to examine our assumptions. From AIDS to Population Health explores the thirty-year history of a unique collaboration between the medical schools of Indiana University and Moi University in Kenya, as it progressed from combating the HIV/AIDS epidemic in East Africa to the building of a national plan to provide universal healthcare to all. The Academic Model Providing Access to Healthcare (AMPATH) program focuses on the medical education of healthcare professionals who are building communities that can take care of themselves. The overwhelming success of the AMPATH program and its continuing vibrant legacy today are showcased through dozens of striking photographs, telling interviews, and revealing anecdotes and encounters. It focuses on four of the most innovative projects among the fifty that AMPATH oversees: a microfinance officer who organizes villagers, an oncology nurse who runs outreach clinics, a farm extension agent working in partnership with a multinational agriculture corporation to improve farm output, and a special healthcare clinic exclusively for adolescents. Over its thirty-year history, AMPATH has served more than a million clients and trained 2,600 medical professionals and community health workers, always guided by its motto "Leading with Care." From AIDS to Population Health presents their compelling stories and explores the program's continuing legacy for the first time. In *Paper Cadavers*, an inside account of the astonishing discovery and rescue of Guatemala's secret police archives, Kirsten Weld probes the politics of memory, the wages of the Cold War, and the stakes of historical knowledge production. After Guatemala's bloody thirty-six years of civil war (1960–1996), silence and impunity reigned. That is, until 2005, when human rights investigators stumbled on the archives of the country's National Police, which, at 75 million pages, proved to be the largest trove of secret state records ever found in Latin America. The unearthing of the archives renewed fierce debates about history, memory, and justice. In *Paper Cadavers*, Weld explores Guatemala's struggles to manage this avalanche of evidence of past war crimes, providing a firsthand look at how postwar justice activists worked to reconfigure terror archives into implements of social change. Tracing the history of the police files as they were transformed from weapons of counterinsurgency into tools for post-conflict reckoning, Weld sheds light on the country's fraught transition from war to an uneasy peace, reflecting on how societies forget and remember political violence. It is designed for use both in the classroom and as a self-study learning tool"--Introduction. This compelling "important and timely" (Drew Faust, Harvard Magazine) #1 New York Times bestseller examines the legacy of slavery in America—and how both history and memory continue to shape our everyday lives. Beginning in his hometown of New Orleans, Clint Smith leads the reader on an unforgettable tour of monuments and landmarks—those that are honest about the past and those that are not—that offer an intergenerational story of how slavery has been central in shaping our nation's collective history, and ourselves. It is the story of the Monticello Plantation in Virginia, the estate where Thomas Jefferson wrote letters espousing the urgent need for liberty while enslaving more than four hundred people. It is the story of the Whitney Plantation, one of the only former plantations devoted to preserving the experience of the enslaved people whose lives and work sustained it. It is the story of Angola, a former plantation-turned-maximum-security prison in Louisiana that is filled with Black men who work across the 18,000-acre land for virtually no pay. And it is the story of Blandford Cemetery, the final resting place of tens of thousands of Confederate soldiers. A deeply researched and transporting exploration of the legacy of slavery and its imprint on centuries of American history, *How the Word Is Passed* illustrates how some of our country's most essential stories are hidden in plain view—whether in places we might drive by on our way to work, holidays such as Juneteenth, or entire neighborhoods like downtown Manhattan, where the brutal history of the trade in enslaved men, women, and children has been deeply imprinted. Informed by scholarship and brought to life by the story of people living today, Smith's debut work of nonfiction is a landmark of reflection and insight that offers a new understanding of the hopeful role that memory and history can play in making sense of our country and how it has come to be. Winner of the National Book Critics Circle Award for Nonfiction Winner of the Stowe Prize Winner of 2022 Hillman Prize for Book Journalism A New York Times 10 Best Books of 2021 In the field of American studies, attention is shifting to the long history of U.S. engagement with the Middle East, especially in the aftermath of war in Iraq and in the context of recent Arab uprisings in protest against economic inequality, social discrimination, and political repression. Here, Alex Lubin and Marwan M. Kraidy curate a new collection of essays that focuses on the cultural politics of America's entanglement with the Middle East and North Africa, making a crucial intervention in the growing subfield of transnational American studies. Featuring a diverse list of contributors from the United States, the Arab world, and beyond, *American Studies Encounters the Middle East* analyzes Arab-American relations by looking at the War on Terror, pop culture, and the influence of the American hegemony in a time of revolution. Contributors include Christina Moreno Almeida, Ashley Dawson, Brian T. Edwards, Waleed Hazbun, Craig Jones, Osamah Khalil, Mounira Soliman, Helga Tawil-Souri, Judith E. By the early twentieth century, there were close to two hundred American missionaries working in the Middle East and Eastern Europe. They came in droves as early as 1830, organizing hundreds of schools, hospitals, printing presses, and seminaries. Until now, the missionaries' sources and perspectives have dominated discussions of this moment in history, but the experiences of the Ottoman authorities are just as, if not more, revealing of an increasingly tense relationship between Christianity and Islam. An enthralling narrative of how locals made sense of American religious activity in the Ottoman Empire, Faithful Encounters examines the relationships between the authorities who managed the empire from the capital city of Istanbul, provincial agents who carried out the capital's orders, and the missionaries who engaged with them. Exploring a wide range of untapped sources – from imperial ministries, security forces, and local petitions to international reports and missionary collections – Emrah Sahin traces the interactions of the Ottoman authorities, focusing on the viewpoints and manoeuvres they adopted to monitor and conquer the missionary presence at a time of turbulent public and political upheaval. Offering a comparative context from which to reconsider recent cultural relations in the region, Faithful Encounters is not only a history of Christian and Muslim relations. It is a lesson about a failing mission in a failing empire, with stunning relevance to the looming religious and ethnic crises of today. Aimed at a secondary school audience. During Prohibition, "Harlem was the 'in' place to go for music and booze," recalled the African American chanteuse Bricktop. "Every night the limousines pulled up to the corner," and out spilled affluent whites, looking for a good time, great jazz, and the unmatched thrill of doing something disreputable. That is the indelible public image of slumming, but as Chad Heap reveals in this fascinating history, the reality is that slumming was far more widespread—and important—than such nostalgia-tinged recollections would lead us to believe. From its appearance as a "fashionable dissipation" centered on the immigrant and working-class districts of 1880s New York through its spread to Chicago and into the 1930s nightspots frequented by lesbians and gay men, Slumming charts the development of this popular pastime, demonstrating how its moralizing origins were soon outstripped by the artistic, racial, and sexual adventuring that typified Jazz-Age America. Vividly recreating the allure of storied neighborhoods such as Greenwich Village and Bronzeville, with their bohemian tearooms, rent parties, and "black and tan" cabarets, Heap plumbs the complicated mix of curiosity and desire that drew respectable white urbanites to venture into previously off-limits locales. And while he doesn't ignore the role of exploitation and voyeurism in slumming—or the resistance it often provoked—he argues that the relatively uninhibited mingling it promoted across bounds of race and class helped to dramatically recast the racial and sexual landscape of burgeoning U.S. cities. Packed with stories of late-night dance, drink, and sexual exploration—and shot through with a deep understanding of cities and the habits of urban life—Slumming revives an era that is long gone, but whose effects are still felt powerfully today. This book is an examination of national identity in a crucial period. The United States first announced its power on the international scene at the Centennial Exhibition in 1876 and first demonstrated that power during World War I. The years in between were a period of dramatic change, when the dynamics of industrialization rapidly accelerated the rate at which Americans were coming in contact with foreign peoples, both at home and abroad. In this work, the author shows how American conceptions of peoplehood, citizenship, and national identity were transformed in these crucial years by escalating economic and military involvements abroad and by the massive influx of immigrants at home. Drawing upon a diverse range of sources, not only traditional political documents, but also novels, travelogues, academic treatises, and art, he demonstrates the close relationship between immigration and expansionism. By bridging these two areas, so often left separate, he rethinks the texture of American political life in a keenly argued and persuasive history. This book shows how these years set the stage for today's attitudes and ideas about "Americanism" and about immigrants and foreign policy, from Border Watch to the Gulf War. The Americas have been the site of two distinct waves of human migration, each associated with human-caused extinctions. The first occurred during the late Pleistocene era, some ten to thirty thousand years ago; the other began during the time of European settler-colonization and continues to this day. In Extinction and the Human Timothy Sweet ponders the realities of animal extinction and endangerment and the often divergent Native American and Euro-American narratives that surround them. He focuses especially on the force of human impact on megafauna—mammoth, whales, and the North American bison—beginning with the moments that these species' extinction or endangerment began to generate significant print archives: transcriptions of traditional Indigenous oral narratives, historical and scientific accounts, and literary narratives by Indigenous American and Euro-American authors. "If the Sixth Extinction is a hyperobject, an event so massively distributed in space and time that it cannot be experienced directly," he writes, "these cases of particular megafauna have nevertheless consistently commanded our focus and attention. They form a starting point for a coherent, approachable history." Reflecting on questions of agency, responsibility, and moral assessment, Sweet engages with the consequences of thinking of humans as fundamentally separate from the rest of the natural world. He investigates stories of a lost race of giants at the time of the first encounters between Europeans and Indigenous Americans; culturally distinct ways of understanding the extinction of the mammoth; the impact of the Euro-American whaling industry and the controversial revitalization of Native American whaling traditions; and the bison's near-extinction at the hands of white market hunters and today's Euro-American and Native American efforts on behalf of the animal's preservation. He reflects on humans' relations with animals through models of divine preservation, competitive extermination, evolutionary determination, biophilia, and treaties with animals. Ultimately, he argues, it is the critical assessment of ideas of human exceptionalism that provides a necessary counterpoint both to apologies for human mastery over nature and deep ecology's attempts to erase the human. Develops students' listening, note-taking, and discussion skills using authentic interviews and lectures and a variety of pre- and post-listening activities. Epic Encounters examines how popular culture has shaped the ways Americans define their "interests" in the Middle East. In this innovative book—now brought up-to-date to include 9/11 and the Iraq war—Melani McAlister argues that U.S. foreign policy, while grounded in material and military realities, is also developed in a cultural context. American understandings of the region are framed by narratives that draw on religious belief, news media accounts, and popular culture. This remarkable and pathbreaking book skillfully weaves lively and accessible readings of film, media, and music with a rigorous analysis of U.S. foreign policy, race politics, and religious history. The new chapter, titled "9/11 and After: Snapshots on the Road to Empire," considers and brilliantly analyzes five images that have become iconic: (1) New York City firemen raising the American flag out of the rubble of the World Trade Center, (2) the televised image of Osama bin-Laden, (3) Afghani women in burqas, (4) the statue of Saddam Hussein being toppled in Baghdad, and (5) the hooded and wired prisoner in Abu Ghraib. McAlister's singular achievement is to illuminate the contexts of these five images both at the time they were taken and as they relate to current events, an accomplishment all the more remarkable since—to paraphrase her new preface—we are today struggling to look backward at something that is still rushing ahead. "Illuminating the complex relationships between tribal informants and twentieth-century anthropologists such as Boas, Parker, and Fenton, who came to their communities to collect stories and artifacts"--Provided by publisher.
